Executive Summary

This Executive Summary provides a brief description of important project details. For completeness of information, the findings, opinions and conclusions presented below have been copied verbatim from Section 7.0. All users of this report are advised to consult the body of the report for more information and greater comprehension of items and conditions described in the Executive Summary.

Ayres Associates conducted this Phase I ESA in accordance with accepted engineering principles and practices, including ASTM Practice E1527-13. Ayres Associates' findings are based on observations and data collected during a limited time period. It should be understood that a site walk over, by nature, is limited in its ability to fully assess the environmental conditions of a property. Ayres Associates does not assume responsibility for the discovery or elimination of adverse environmental conditions that possibly could cause accidents, injury, or damage.

Project Scope

City of Palatka, 201 N 2nd St, Palatka, FL 32177, retained Ayres Associates to conduct a Phase I Environmental Site Assessment (ESA) of the Ride Solution, Inc. property at 310 S 10th St, Palatka, F. The property is referred to as the "subject property" in this report.

The objective of the Phase I ESA was to assess the environmental conditions on the subject property and surrounding area to identify recognized environmental conditions (RECs) that might adversely affect the subject property. A site reconnaissance of the subject property was conducted on August 23, 2016.

Purpose

On December 30, 2013, the U.S. Environmental Protection Agency issued its final rule on Standards and Practices for Conducting All Appropriate Inquiries (AAI). This rule references ASTM Practice E1527-13, *Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process* as being compliant with the statutory criteria for AAI. The purpose of this practice is to define good commercial and customary practice in the United States of America for conducting an ESA of a parcel of commercial real estate with respect to the range of contaminants within the scope of Comprehensive Environmental Response, Compensation and Liability Act (CERCLA) and petroleum products. As such, this practice is intended to permit a user to satisfy one of the requirements to qualify for the innocent landowner, contiguous property owner, or bona fide prospective purchaser limitations on CERCLA liability: that is, the practice that constitutes "all appropriate inquiry into the previous ownership and uses of the property consistent with good commercial or customary practice." The terms "Recognized Environmental Condition," "Historical Recognized Environmental Condition", "Controlled Recognized Environmental Condition" and "*de minimis* condition" used in this Phase I ESA are defined under the ASTM Practice E1527-13, and are further described in Section 1.4 of this report.

Summary of Findings

The following summary of findings is based on a site reconnaissance to view the subject property and adjoining properties, review of environmental and historical records, and interviews conducted during the preparation of this Phase I ESA report:

- The subject property contains two parcels covering is 2.07 acres in the Southwest ¼ of Section 42, Township 10 South, Range 27 East, in the City of Palatka, Putnam County, Florida. The subject property has a physical address of 310 S 10th St. The property is identified by parcel numbers 42-10-27-6850-1600-0010 and 42-10-27-6850-1600-0011 with legal descriptions of “DICKS MAP OF PALATKA MB2 P46, BLK 160 (EX BK201 P205) + PT, OF ADJ CLOSED ELEVENTH ST, OR272 P173” and “DICKS MAP OF PALATKA MB2 P46, BLK 160 N 100FT OF E 100FT OF, BLK BK201 P205 + PT OF ADJ, CLOSED ELEVENTH ST OR272 P173”, respectively.
- There are four main buildings on the subject property. One approximately 2,000-square-foot (ft²) building that is rectangular and is orientated east-west, is used to store bus parts, personal items, and items for future reuse from site operations such as empty 55-gallon containers. This building was constructed around 1955. An approximately 9,000-ft² vehicle maintenance building was constructed in 1998 and located on the western center of the property. This building is where the bus maintenance and rebuilding takes place. An approximate 3,000-ft² rectangular building along the southern perimeter is an open air building with its primary focus used to work on the exterior of the buses, and also for cleaning of the inside of the buses under the protection of roof and overhang. This building was constructed between 1980 and 1994. The fourth building is approximately 1,617-ft², constructed in 1955, and contains offices and the drivers lounge. This building is located in the center east of the property. There was no cooling system observed in the main repair and storage buildings, but there was A/C inside the main office building and driver lounge area. Heating appeared to be forced air electric heat. The property is connected to municipal sewer and water service.
- Ride Solutions Inc. is the current occupant of the subject property. They are a non-profit transit agency which provides transportation services, including scheduled, county-wide public transportation, multi-modal connections, human service agency and student transportation, van pool commuter services, non-emergency wheelchair and stretcher transportation. Ride Solution began its operations in 1986 as ARC Transit. This property has been used in this capacity since 1992.
- Based on Sanborn fire insurance maps, the majority of the subject property was undeveloped prior to 1924 with rail spurs to the north. The property’s use changed to industrial between 1924 and 1930 when Mullis Bro’s Novelty Works constructed a wood working facility on the property. The facility included: a woodworking shop, a warehouse, a lumber shed, and an office. The maps indicate that the facility was served by rail lines on north adjoining property. Between 1936 and 1948, Campbell J.W. Inc. took over occupancy of the property and was operating a warehouse on the property. Around 1959, the property was occupied by Cameron Company, a concrete product and building material facility. By 1962, two dwellings and an automotive garage are indicated on the northeast parcel of the subject property. The larger parcel contained a cement and building material warehouse in the north and a concrete products manufacturing building in the west. A welding room was located in the south end of the concrete products building and an office was located in the center of the subject property. Cameron Company vacated the property between 1982 and 1989. ARC Transit, the predecessor of Ride Solutions, purchased the property in 1991 and started operating a non-profit community bus transit service. Operations included the repair, maintenance, and storage of buses. In 1998, the company changed its name to Ride Solution, Inc. but continued with the same operations.

- Dozens of empty plastic and metal 55-gallon drums were observed around the facility. Most the drums previously contained hydraulic oil, engine oil, and brake fluids. The drums are empty and stored for pick up or reuse.
- Five aboveground storage tanks (ASTs) were observed during the site visit. Two 500-gallon tanks contained unleaded gasoline and two 500-gallon tanks contained diesel fuel. The fifth tank is a used oil tank next to the bus maintenance garage. The used oil is routinely pumped from the tank by a local petroleum recycler.
- *De minimis* petroleum staining was noted on the property, including near the waste oil AST.
- The subject property is identified on several environmental databases including the emergency release notification system (ERNS), leaking underground storage tank (LUST), underground storage tank (UST), and AST.
 - The subject property is identified on the ERNS database as 310 S 10th St and by site ID 2005770090. On August 23, 2005, the National Response Center received notification that diesel fuel spilled onto the ground while a bus was refueling from an AST on the property. The size of the spill was not provided on the Facility Detail Report provided by EDR.
 - The subject property is identified on the LUST database as “Cameron Co.” (Facility ID 8515709). On July 3, 1991, the Florida Department of Environmental Protection (FDEP) received notification that petroleum contamination was discovered during the closure of two 2,000-gallon USTs. In 1994, the FDEP closed the LUST investigation after reviewing data from a Phase II ESA. Based on the regulatory status, this petroleum release was addressed to the satisfaction of the applicable regulatory authority without the use of continuing obligations involving engineering or institutional controls.
 - “Cameron Co.” is identified as the owner of a two removed 2,000-gallon leaded gasoline and vehicular diesel USTs and a 750-gallon unleaded gasoline AST at 310 S 10th St (Facility ID 8515709). According to the FDEP storage tank database, the USTs and AST were removed on July 31, 1991, and June 30, 1988, respectively. None of the five current ASTs at the facility appear to be registered.
- No adjoining properties are listed on standard environmental databases. Additional properties in the area appear unlikely to result in a recognized environmental condition (REC) on the subject property based on review of standard environmental records.
- The 1915 Sanborn fire insurance map incorrectly depicts a rail spur crossing the property’s northeast quarter. The rail spur is correctly drawn north of the property on both the 1909 and 1924 Sanborn maps. Additionally, the shape of the west adjoining property line indicates the rail spur ran north of the subject property. The arc shaped, northeast/southwest trending property line parallels the rail spur as shown on 1897, 1903, 1909, 1924, 1930, and 1962 fire insurance maps.

Conclusions and Opinions

We have performed a Phase I Environmental Site Assessment in conformance with the scope and limitations of ASTM Practice E1527-13 of 310 South 10th Street, Palatka, F, the subject property. Any exceptions to, or deletions from, this practice are described in Section 1.6 of this report. This assessment

has revealed no evidence of recognized environmental conditions in connection with the subject property except for the following:

Recognized Environmental Conditions

- On August 23, 2005, the National Response Center received notification that an unspecified amount of diesel fuel spilled onto the ground while a bus was refueling from an AST on the subject property. The documented release of a petroleum product on the subject property is considered a REC.

Controlled Recognized Environmental Conditions

- Controlled RECs have not been identified by this assessment.

Historical Recognized Environmental Conditions

- The subject property is identified on the LUST database as “Cameron Co.” (Facility ID 8515709). The DEP was notified when petroleum contamination was discovered during the closure of two 2,000-gallon USTs for gasoline and diesel fuel in 1991 but closed the LUST case after reviewing data from a Phase II ESA. Both tanks were located southwest of the vehicle maintenance building. Based on the regulatory status, this petroleum release was addressed to the satisfaction of the applicable regulatory authority without the use of continuing obligations and is considered an HREC.

Additional Information

Data Gaps

A data gap is considered the inability to obtain information required by ASTM E1527-13 despite good faith efforts by Ayres Associates to gather such information. The following data gaps were identified during the preparation of this Phase I ESA:

- Ayres Associates was unable to determine all uses of the subject property from 1924 to 1930, 1936 to 1948 and from 1983 to 1989. The absence of historical sources indicating development during these intervals is considered a data gap but is not anticipated to significantly limit the conclusions of this Phase I ESA.

Business Environmental Risks

Business Environmental Risks (BERs) are risks which can have a material environmental or environmentally-driven impact on the business associated with the current or planned use of a parcel of commercial real estate, not necessarily limited to those environmental issues required to be investigated in this practice.

- Due to the age of the former warehouse on the north edge and the office on the east portion on the subject property, there is a possibility that these structures have asbestos containing materials (ACMs) and/or lead-bearing paint. The cost to inspection and abate lead paint and/or ACM prior to renovation or demolition activities is considered a BER.

Additional Investigation

This section is included to provide an opinion in the unusual circumstance that greater certainty is required regarding the RECs identified by this Phase I ESA. Inclusion of such an opinion does not render the assessment incomplete, nor does it constitute a recommendation for a Phase II ESA or other assessment activities.

- On August 23 2005, the National Response Center received notification that diesel fuel spilled onto the ground while a bus was refueling from an AST on the property. Ayres Associates was unable to determine the size of the spill from a review of ERNS database, DEP records or Fire Department Records. Additional investigation is needed to determine the volume and location of release and what action, if any, was taken to clean up the spill.

Acknowledgement

On behalf of the City of Palatka, FL, Ayres Associates would like to extend its sincere appreciation to the U.S. Environmental Protection Agency (USEPA) for their funding support. The U.S. EPA Brownfield Site Assessment Grant Program not only graciously awarded the City of Palatka this grant to assist in funding the environmental activities outlined in this report, but has continued to support the City's efforts as they move toward redevelopment. Without this funding support, this Brownfield site may have laid idle indefinitely. We are indebted to the U.S. EPA for making financial assistance available for this important redevelopment project.

1.0 Introduction

1.1 Project Information

Project Name:	Palatka - Task 2: Phase I and Phase II ESA
Site Name & Address:	Ride Solution, Inc. Parcel ID 42-10-27-6850-1600-0010 and 42-10-27-6850-1600-0011 310 South 10 th Street Palatka, F
Job Number:	19-0668.26
Site Reconnaissance Date:	August 23, 2016

1.2 Location and Legal Description

The subject property is 2.07 acres on two parcels of land located in the Southwest $\frac{1}{4}$ of Section 42, Township 10 South, Range 27 East, in the City of Palatka, Putnam County, Florida. The subject property has a physical address of 310 S 10th St and is identified by parcel numbers 42-10-27-6850-1600-0010 and 42-10-27-6850-1600-0011 with legal descriptions of "DICKS MAP OF PALATKA MB2 P46, BLK 160 (EX BK201 P205) + PT, OF ADJ CLOSED ELEVENTH ST, OR272 P173" and "DICKS MAP OF PALATKA MB2 P46, BLK 160 N 100FT OF E 100FT OF, BLK BK201 P205 + PT OF ADJ, CLOSED ELEVENTH ST OR272 P173" respectively.

See Figure 1 in Appendix A for the regional location and Figure 2 for a recent aerial photograph of the subject property. Recent property records are also provided in Appendix A.

1.3 Project Scope

City of Palatka, 201 N 2nd St, Palatka, FL 32177, retained Ayres Associates to conduct a Phase I Environmental Site Assessment (ESA) of the Ride Solution, Inc. property, at 310 S 10th St, Palatka, F. The property is referred to as the "subject property" in this report.

The objective of the Phase I ESA was to assess the environmental conditions on the subject property and surrounding area to identify recognized environmental conditions (RECs) that might adversely affect the subject property. A site reconnaissance of the subject property was conducted on August 23, 2016.

1.4 Purpose

On December 30, 2013, the U.S. Environmental Protection Agency issued its final rule on Standards and Practices for Conducting All Appropriate Inquiries (AAI). This rule references ASTM Practice E1527-13, *Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process* as being compliant with the statutory criteria for AAI. The purpose of this practice is to define good commercial

and customary practice in the United States of America for conducting an ESA of a parcel of commercial real estate with respect to the range of contaminants within the scope of Comprehensive Environmental Response, Compensation and Liability Act (CERCLA) and petroleum products. As such, this practice is intended to permit a user to satisfy one of the requirements to qualify for the innocent landowner, contiguous property owner, or bona fide prospective purchaser limitations on CERCLA liability: that is, the practice that constitutes “all appropriate inquiry into the previous ownership and uses of the property consistent with good commercial or customary practice.” The goal of the Phase I ESA process is to identify Recognized Environmental Conditions.

The term “Recognized Environmental Conditions,” means the presence or likely presence of any hazardous substances or petroleum products in, on or at a property: (1) due to release to the environment; (2) under conditions indicative of a release to the environment; or (3) under conditions that pose a material threat of a future release to the environment. The term includes hazardous substances or petroleum products even under conditions in compliance with laws. The term is not intended to include *de minimis* conditions that generally do not present a threat to human health or the environment and that generally would not be the subject of an enforcement action if brought to the attention of appropriate governmental agencies. Conditions determined to be *de minimis* are not recognized environmental conditions. The term “Controlled Recognized Environmental Condition” means a recognized environmental condition resulting from a past release of hazardous substances or petroleum products that has been addressed to the satisfaction of the applicable regulatory authority (for example, as evidenced by the issuance of a no further action letter or equivalent, or meeting risk-based criteria established by regulatory authority), with hazardous substances or petroleum products allowed to remain in place subject to the implementation of required controls (for example, property use restrictions, activity and use limitations, institutional controls, or engineering controls). The term “Historical Recognized Environmental Condition” means a past release of any hazardous substances or petroleum products that has occurred in connection with the property and has been addressed to the satisfaction of the applicable regulatory authority or meeting unrestricted use criteria established by a regulatory authority, without subjecting the property to any required controls. Before calling the past release a historical recognized environmental condition, the environmental professional must determine whether the past release is a recognized environmental condition at the time of the Phase I Environmental Site Assessment is conducted (for example, if there has been a change in the regulatory criteria).

Additionally, the Phase I ESA process may identify “Business Environmental Risks”, meaning risks which can have a material environmental or environmentally-driven impact on the business associated with the current or planned use of a parcel of commercial real estate, not necessarily limited to those environmental issues required to be investigated in this practice. Consideration of Business Environmental Risk issues may involve addressing one or more non-scope considerations, including but not limited to asbestos-containing building materials, biological agents, cultural and historic resources, ecological resources, endangered species, health and safety, indoor air quality unrelated to releases of hazardous substances or petroleum products into the

environment, industrial hygiene, lead-based paint, lead in drinking water, mold, radon, regulatory compliance and wetlands.

1.5 Tasks, User Questionnaire, and Non-Scope Considerations

To assess the environmental conditions of the subject property, Ayres Associates performed the following tasks: (1) research into subject property history to identify prior uses and owners; (2) interviews with key site contacts and appropriate governmental staff and review of government agency records to identify environmental conditions affecting the subject property; (3) review of available aerial photographs and/or fire insurance maps of the subject property and surrounding area; (4) review of published geological and hydrological information concerning the subject property and surrounding areas; (5) a site visit to the subject property and surrounding areas to observe environmental conditions and complete an asbestos inspection; and (6) preparation of a report documenting findings and offering recommendations for further investigation deemed necessary and appropriate (see Appendix B, Scope of Services).

A User Questionnaire was submitted to a representative of City of Palatka with All Appropriate Inquiry requirements as defined in CERCLA, 42 U.S.C. §9601(35)(B). The questionnaire was completed by Ms. Mandi Tucker.

Non-scope considerations were not requested by the User or completed as part of the scope of services for this Phase I ESA.

1.6 Limitations, Deviations, Exceptions and Significant Assumptions

The following limitations were encountered during the preparation of this Phase I ESA:

- The quality and scale of some of the aerial photographs limited the ability to make observations related to the subject property development and/or activities.

There were no deviations or exceptions from ASTM Practice E1527-13 or significant assumptions made during the preparation of this Phase I ESA.

1.7 Special Terms and Conditions

This Phase I ESA was conducted in accordance with our scope of services as included in Appendix B. No additional special terms and conditions were included in this Phase I ESA.

1.8 User Reliance

This report is intended for the sole use of City of Palatka, U.S EPA, and potential lenders or purchasers. Ayres Associates does not assume liability for use of this report by unauthorized parties.

2.0 User Provided Information

A User Questionnaire was submitted to a representative of City of Palatka with All Appropriate Inquiry requirements as defined in CERCLA, 42 U.S.C. §9601(35)(B). The questionnaire was completed by Ms. Mandi Tucker. A copy is provided in Appendix B.

2.1 Environmental Liens

The User is not aware of any environmental liens filed or recorded against the subject property.

Ayres Associates retained EDR to perform an environmental lien search for the property. EDR identified a Warranty Deed dated December 22, 1992. The search did not reveal any environmental liens but did find documentation from 1998 of the owner's name change from ARC Transit to Ride Solutions.

2.2 Activity and Use Limitations

The User is not aware of any AULs that are in place or have been filed or recorded against the subject property.

No AULs were found during the environmental lien search performed by EDR.

2.3 Specialized or Actual Knowledge or Experience

The User informed Ayres Associates that the property is used as a bus terminal and garage.

2.4 Valuation Reduction for Environmental Issues

The User is not aware if the purchase price value reasonably reflects the fair market value of the property.

2.5 Commonly Known or Reasonably Ascertainable Information

The User is aware of the property's use as a bus terminal and garage but does not have any knowledge of specific chemicals, spills or environmental cleanups at the property.

2.6 Obvious Indicators of Contamination

The User is not aware of any obvious indicators of contamination.

3.0 Records Review

3.1 Standard Federal Environmental Records

EDR (Environmental Data Resources, Inc.), a commercial database service, provided a federal, state, and local environmental records search for the subject property. The EDR database search was completed on August 4, 2016, and a copy of the database report is provided in Appendix C. This section addresses specific sites identified on standard federal environmental records that could be considered a REC in connection with the subject property if they were found within the appropriate ASTM search radius. The search radius of a particular record may be adjusted in the discretion of Ayres Associates due to density of setting in which the subject property is located, the distance that hazardous substances or petroleum are likely to migrate based on local geologic or hydrogeologic conditions, the property types, existing or past uses of surrounding properties, and other reasonable factors.

Where possible, Ayres Associates also evaluates sites that are identified in standard environmental records but are unable to be mapped or plotted due to insufficient location information. These sites may be referred to as “orphan”, “non-geocoded”, “unmapped”, or “unplottable” sites in commercial database reports. Such site listings may constitute a data gap in the event Ayres Associates is not able to determine their location. Data gaps and their significance are discussed in Section 7.3.1.

3.1.1 National Priorities List (NPL) Site List

The NPL or Superfund list is the United States Environmental Protection Agency’s (U.S. EPA’s) list of the most serious uncontrolled or abandoned hazardous waste sites identified for possible long-term remedial action under the Superfund program. The NPL, which U.S. EPA is required to update at least once a year, is based primarily on the score a site receives from U.S. EPA’s Hazard Ranking System. A site must be on the NPL to receive money from the Superfund Trust Fund for remedial action. The ASTM search radius is 1.0 miles.

- The subject property is not identified on this database.
- Additional sites are not identified on this database.

3.1.2 Delisted NPL Site List

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the U.S. EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425(e), sites may be deleted from the NPL where no further response is appropriate. The ASTM search radius is 0.5 miles.

- The subject property is not identified on this database.
- Additional sites are not identified on this database.

3.1.3 Comprehensive Environmental Response, Compensation, and Liability Information System (CERCLIS) List

CERCLIS is a database of potential and confirmed hazardous waste sites at which the U.S. EPA Superfund program has some involvement. It contains sites that are either proposed to be or are on the NPL as well as sites that are in the screening and assessment phase for possible inclusion on the NPL. The ASTM search radius is 0.5 miles.

- The subject property is not identified on this database.
- Additional sites are not identified on this database.

3.1.4 CERCLIS No Further Remedial Action Planned (NFRAP) Site List

An archived site is one at which U.S. EPA has determined that assessment has been completed and no further remedial action is planned under the Superfund program at this time. The Archive designation means that, to the best of U.S. EPA's knowledge, assessment at a site has been completed and that U.S. EPA has determined no further steps will be taken to list this site on the National Priorities List (NPL). This decision does not necessarily mean that there is no hazard associated with a given site; it only means that, based upon available information, the location is not judged to be a potential NPL site. The ASTM search radius is 0.5 miles.

- The subject property is not identified on this database.
- One additional site is identified on this database.
 - Palatka Gas Works is a former manufactured gas plant that is identified by Florida site ID 0404731 and EPA ID FLD981932007. This site is approximately 0.418 miles east-northeast of the subject property located at 512 Main St. In 1991, the U.S. EPA determined that the site did not qualify for the NPL and placed it on the NFRAP site list. Based on the regulatory status and location, it is unlikely that contamination from this site could migrate to the subject property.

3.1.5 Resource Conservation and Recovery Act (RCRA) Corrective Action (CORRACTS) Facilities List

RCRAInfo is U.S. EPA's comprehensive information system, providing access to data supporting the RCRA of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. RCRA (Corrective Action Program) requires treatment, storage and disposal (TSD) facility owners and operators to investigate and cleanup hazardous waste releases at hazardous waste facilities. The RCRA Corrective Action Program allows these facilities to address the investigation and cleanup of these hazardous releases themselves. RCRA Corrective Action facilities include many current and former chemical manufacturing plants, oil refineries, lead smelters, wood preservers, steel mills, commercial landfills, and a variety of other types of entities. Due to poor

practices prior to environmental regulations, Corrective Action facilities have left large stretches of river sediments laden with PCBs; deposited lead in residential yards and parks beyond site boundaries; polluted drinking water wells in rural areas with chlorinated solvents; tainted municipal water supplies used by millions; and introduced mercury into waterways, necessitating fish advisories. At these sites, the Corrective Action Program ensures that cleanups occur. U.S. EPA and state regulators work with facilities and communities to design remedies based on the contamination, geology, and anticipated use unique to each site. The ASTM search radius is 1.0 miles.

- The subject property is not identified on this database.
- Additional sites are not identified on this database.

3.1.6 RCRA non-CORRACTS TSD Facilities List

RCRAInfo is U.S. EPA's comprehensive information system, providing access to data supporting the RCRA of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. This database includes Non-Corrective Action sites listed as treatment, storage and/or disposal facilities of hazardous waste as defined by the RCRA. The ASTM search radius is 0.5 miles.

- The subject property is not identified on this database.
- Additional sites are not identified on this database.

3.1.7 RCRA Generators List

RCRAInfo is U.S. EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. RCRAInfo replaces the data recording and reporting abilities of the Resource Conservation and Recovery Information System (RCRIS) and the Biennial Reporting System (BRS). A hazardous waste generator is any person or site whose processes and actions create hazardous waste (see 40 CFR 260.10). Generators are divided into three categories based upon the quantity of waste they produce:

1. Large Quantity Generators (LQGs) generate 1,000 kilograms per month or more of hazardous waste, more than 1 kilogram per month of acutely hazardous waste, or more than 100 kilograms per month of acute spill residue or soil.
2. Small Quantity Generators (SQGs) generate more than 100 kilograms, but less than 1,000 kilograms, of hazardous waste per month.
3. Conditionally Exempt Small Quantity Generators (CESQGs) generate 100 kilograms or less per month of hazardous waste, or 1 kilogram or less per month of acutely hazardous waste, or less than 100 kilograms per month of acute spill residue or soil.

The ASTM search radius is the subject property and adjoining properties.

- The subject property is not identified on these databases.
- Adjoining properties were not identified on these databases.

3.1.8 Institutional Control and Engineering Control Registries

Institutional controls are non-engineered instruments, such as administrative and legal controls, that help minimize the potential for human exposure to contamination and/or protect the integrity of the remedy. Although it is U.S. EPA's expectation that treatment or engineering controls will be used to address principal threat wastes and that groundwater will be returned to its beneficial use whenever practicable, institutional controls play an important role in site remedies because they reduce exposure to contamination by limiting land or resource use and guide human behavior at a site. For instance, zoning restrictions prevent site land uses, like residential uses, that are not consistent with the level of cleanup.

Engineering controls encompass a variety of engineered and constructed physical barriers (e.g., soil capping, subsurface venting systems, mitigation barriers, fences) to contain and/or prevent exposure to contamination on a property. The ASTM search radius is the subject property only.

- The subject property is not identified on these databases.

3.1.9 Emergency Response Notification System (ERNS) List

Database of oil and hazardous substances spill reports controlled by the National Response Center. The primary function of the National Response Center is to serve as the sole national point of contact for reporting all oil, chemical, radiological, biological, and etiological discharges into the environment anywhere in the United States and its territories. The ASTM search radius is the subject property only.

- The subject property is identified on the ERNS database as 310 S 10th St and by site ID 2005770090. On August 23, 2005, the National Response Center received notification that diesel fuel spilled onto the ground while a bus was refueling from an AST on the property. The size of the spill was not provided on the Facility Detail Report provided by EDR.

3.2 Standard State Environmental Records

This section addresses specific sites identified on standard state (or tribal, where applicable) environmental records that could be considered a REC in connection with the subject property if they were found within the appropriate ASTM search radius. Results of the EDR database report were cross-referenced with information obtained directly from state regulatory agency databases available online, including the FDEP's

Contamination Locator Map (CLM), which includes brownfields, petroleum, superfund, and other waste cleanup sites.

Although all sites in CLM are suspected or perceived to be contaminated, further investigation may show that some sites are not contaminated. Conversely, some contaminated sites that are still undergoing preliminary screening by the Department may not yet appear in CLM. Sites that are closed or are no longer under FDEP's cleanup oversight will not appear in CLM. Also, CLM may not include all information about federal facilities.

- The subject property is identified on this database. These database listings are discussed in applicable parts of Section 3.2.
- Additional sites are identified on this database. These sites are discussed in applicable parts of Section 3.2.

3.2.1 State-equivalent NPL & CERCLIS Site Lists

Florida's State-Funded Action Sites are state hazardous waste sites (SHWS) considered to be equivalent to CERCLIS and are regulated by the FDEP. These sites may or may not already be listed on the federal CERCLIS list. Priority sites planned for cleanup using state funds (state equivalent of Superfund) are identified along with sites where cleanup will be paid for by potentially responsible parties. The ASTM search radius is 0.5 miles for state-equivalent CERCLIS sites. Florida does not have a state database equivalent to the NPL.

- The subject property is not identified on these databases.
- Additional sites are not identified on these databases.

3.2.2 Landfill and Solid Waste Disposal Site Lists

The FDEP regulates landfills to prevent negative impacts to people and the environment, and maintains lists of licensed solid waste landfills, as well as old historic waste disposal facilities, in the state of Florida. The ASTM search radius is 0.5 miles.

- The subject property is not identified this database.
- Four solid waste facilities (SWF) or landfills (LF) are identified within 0.5 miles of the subject property. Three of the sites listed are inactive and associated with the improper storage/disposal of used tires, and the fourth is the closed City Lot LF. Based their location and regulatory status, none of these sites are likely to have contamination that could migrate onto the subject property.

3.2.3 Leaking Storage Tank Lists

The FDEP maintains lists of leaking underground storage tank (LUST) and leaking aboveground storage tank (LAST) sites. The ASTM search radius is 0.5 miles.

- The subject property is identified on the LUST database as “Cameron Co.” (Facility ID 8515709). On July 3, 1991, the FDEP received notification that petroleum contamination was discovered during the closure of two 2,000-gallon USTs. In 1994, the FDEP closed the LUST investigation after reviewing data from a Phase II ESA. Based on the regulatory status, this petroleum release was addressed to the satisfaction of the applicable regulatory authority without the use of continuing obligations.
- Twenty-five LUST sites and one LAST site are identified within 0.5 miles of the subject property. Of the LUST sites, ten have a No Further Action (NFA) status, two have Cleanup Not Required (NREQ) status and four have approved Site Rehabilitation Completion Reports (SRCR). These sites have been addressed to the satisfaction of the FDEP and are unlikely have contamination that could migrate to the subject property. None of the remaining LUST and LAST sites are on an adjoining property or likely to have contamination with the potential to migrate to the subject property.

3.2.4 Registered Storage Tank Lists

FDEP maintains a list of registered underground storage tank (UST) and aboveground storage tank (AST) locations regulated under state code. The ASTM search radius is the subject property and adjoining properties only.

- The subject property is identified on the UST and AST databases.
 - “Cameron Co.” is identified as the owner of a two removed 2,000-gallon (leaded gasoline and vehicular diesel) USTs and a 750-gallon unleaded gasoline AST located at 310 S 10th St (Facility ID 8515709). According to the FDEP storage tank database, the USTs and AST were removed on July 31, 1991, and June 30, 1988, respectively.
- Adjoining properties are not identified within these databases.

3.2.5 Institutional Control and Engineering Control Registries

These are sites that use engineered barriers or institutional controls such as groundwater use restrictions (e.g. restriction to install potable well on the site). The ASTM search radius is the subject property only.

- The subject property is not identified on these databases.

3.2.6 Voluntary Cleanup Sites

These sites include closed and active voluntary cleanup sites regulated by the FDEP. The ASTM search radius is 0.5 miles.

- The subject property is not identified on these databases.
- Additional sites are not identified on these databases.

3.2.7 Brownfield Sites

Brownfields are defined by the FDEP as abandoned, idle or underused commercial or industrial properties, where the expansion or redevelopment is hindered by real or perceived contamination. Brownfield properties present public health, economic, environmental and social challenges to the rural and urban communities in which they are located. The ASTM search radius is 0.5 miles.

- The subject property is not identified on these databases.
- One additional site is identified on these databases.
 - Former Dee Dee Bar is a Brownfield site 0.320 miles north of the subject property at 1100 Madison St. The property was previously occupied by a gas station that operated from the 1950s to 70s, but the site has been abandoned for over 20 years. The purchaser removed four USTs and later found evidence of two additional tanks which remain. In 2008, the site was donated to the Florida Endowment Foundation for Florida's Graduates. Based on the location and regulatory status, it is unlikely that contamination at this site could migrate to the subject property.

3.3 Additional Environmental Records

3.3.1 Regulatory Agency File and Records Review

If the subject property or any of the adjoining properties is identified on one or more of the standard environmental records sources, pertinent regulatory files and/or records associated with the listing are reviewed by Ayres Associates to assist in identifying RECs in connection with the subject property. If such a review is not warranted in the opinion of Ayres Associates, justification for not conducting the regulatory file review is provided in this section. As an alternative, files or records from other sources may be reviewed, if deemed sufficient to evaluate the existence of a REC in connection with the subject property. The file review pertains to the following properties identified in standard environmental record sources.

Address: 310 S 10th St

Site Name(s): Cameron Co.

Database(s): LUST, UST, AST, ERNS

Relation to subject property: Subject property

- In the opinion of Ayres Associates, a file review is warranted for this property since diesel and petroleum have been reported to have leaked and spilled onto the subject property. According to tank records, found on OCULUS (FDEP's electronic document management system), the FDEP received notification that petroleum contamination was discovered during the closure of two 2,000-gallon USTs (leaded gasoline and vehicular diesel). In 1994, the FDEP closed the LUST investigation after reviewing data from a

Phase II ESA. The subject property is also identified on the ERNS database due to a diesel fuel spill onto the ground while a bus was refueling from an AST on the property on August 23, 2005. The size of the spill was not documented. Ayres Associates attempted to contact the Ride Solutions Director, Mr. Boyd Thompson, several times for additional information about the release. As of the printing of this report Mr. Thompson has not responded.

3.3.2 Additional Federal, State, Tribal and Local Environmental Record Sources

Local and/or additional federal, state or tribal records are reviewed in the discretion of Ayres Associates to enhance and supplement information obtained from standard environmental record sources. Sources for the records may include but are not limited to municipal, county or regional departments, agencies or electric utility companies.

The Palatka Fire Department did not have documentation of hazardous materials or spills on the subject property but confirmed in a phone interview that the property is a terminal for buses. A summary of the interview provided by the Palatka Fire Department is included in Section 5.2.

3.4 Physical Setting Sources

The sole standard physical setting source is United States Geological Survey (USGS) topographic maps. Additional physical setting sources, including soil, groundwater or bedrock surveys and site specific hydrogeologic data maintained by FDEP for known contaminated sites in the area, are reviewed in the discretion of Ayres Associates to identify conditions in which releases of hazardous substances or petroleum products are likely to migrate to the subject property or from or within the subject property into the groundwater or soil. Additional research is included in Appendix D, and topographic maps are included with historical research in Appendix E.

3.4.1 Topography, Soils and Bedrock

The Physical Setting Source section of the environmental database report, which describes topographic information, maps the approximate center of the site at 22 feet above mean sea level, and lists a general topographic gradient towards the southeast.

The subject property is in the St. Johns River Offset, a broad flat valley covering the St. Johns River and numerous lakes. The valley and its features resulted from the dissolution of limestone beneath sand and clay units of Hawthorn group, which underlay the valley (USGS, 2013). This portion of the Offset is covered by deposits of unconsolidated Pleistocene and Holocene sediments primarily composed of clay and beach sands (FDEP, 2016).

The NRCS soil report classifies surface soil on the subject as Myakka-Urban land complex. This soil unit develops on the flatwoods and marine terraces in

climates that receive 46 to 54 inches of precipitation annually and have average temperatures between 68 to 75°F. Soils in this classification develop from sandy marine deposits, are poorly drained, and have moderately high to high hydraulic conductivities. Soil profiles typically contain more than 6 feet of fine sand and have water tables from 6 to 18 inches below ground surface.

3.4.2 Surface and Groundwater

General site drainage is southeast toward the S 10th St. Surface water is not present on the subject property. St. Johns River is approximately 0.4 miles southeast of the subject property. The subject property is within the Lower St. Johns River Basin which ultimately drains into the Atlantic Ocean directly east of Jacksonville.

FEMA flood plain maps indicate the subject property is within an area of minimal flood hazard identified as “Zone X”. FEMA describes Flood Zone AE as an area outside the 0.2% annual chance floodplain. This means it has a 0.2% or less chance to flood annually.

The deposits of unconsolidated Pleistocene and Holocene sediments on the property are part of the surficial aquifer system that covers a large portion of Florida. Aquifers within this system are typically unconfined, less than 50 feet thick and have transmissivities ranging from 1,000 to 10,000 square feet per day. The majority of the water entering the surficial aquifer system is discharged as base flow to streams before it can infiltrate the clayey confining units of the Hawthorn Group, which separate it from the Floridian aquifer system (U.S. Geological Survey, 1990). Site-specific information has been reviewed during this assessment, the depth to groundwater is expected to be less than 5 feet and the flow direction is anticipated to be to the northeast.

3.5 Historical Records Review

Ayres Associates consulted the following standard historical sources to develop a history of the previous uses of the subject property and surrounding area, in order to help identify the likelihood of past uses having led to RECs in connection with the subject property. All obvious uses of the subject property shall be identified from the present, back to the subject property’s first developed use, or back to 1940, whichever is earlier. Notwithstanding data failure, standard historical sources may be excluded if the sources are not reasonably ascertainable, or if past experience indicates that the sources are not likely to be sufficiently useful, accurate or complete in terms of satisfying the objectives.

3.5.1 Aerial Photographs

Aerial photographs dated 1953, 1964, 1971, 1980, 1994, 1999, 2005, 2006, 2007, and 2010 were prepared by EDR, and reviewed for evidence of past land use. Aerial photographs are included in Appendix E.

A building is located in the center of the subject property and two smaller buildings are located on the northeast parcel in the aerial photograph from

1953. A storage area is on the northwest section of the subject property at this time as well. Two railroad spurs approach the subject property from the west and end just north of the subject property border. Residential properties surround the south and east sides and a railway exists to the west and north of the subject property.

By 1964, a building has been added to the west and north side of the subject property. The center building has been removed and a couple smaller buildings have taken its place. Storage is on the southeast portion of the subject property. A smaller building has been constructed on the north side of the northeast parcel between the previously constructed buildings. Development of Cameron Company has arisen on the parcel west of the subject property during this time. Uses of the other surrounding properties are similar to the 1953 aerial photograph. The aerial photograph taken in 1971 is similar to the 1964 photograph.

By 1980, the buildings on the northeast parcel within the subject property have changed. The rest of the subject property and surrounding properties at this time are similar to the 1971 aerial photograph. By 1994, a building was constructed on the south side of the subject property and a building was removed from the adjoining parcel to the west. A U.S. Post Office building was constructed northwest of the subject property by 1994 as well.

The aerial photographs from 1999 to 2010 are similar to the photograph taken in 1994.

3.5.2 Fire Insurance Maps

From 1867 to the present, the Sanborn Map Company of Pelham, New York, produced a uniform series of large-scale maps depicting the commercial, industrial, and residential sections of thousands of cities and towns in the United States. These maps were designed to assist fire insurance agents in determining the degree of hazard associated with a particular property. Maps show the size, shape, and construction of dwellings and commercial or industrial buildings, and depict the locations of any hazardous materials, ASTs and USTs. Maps may also indicate specific property uses or occupants.

Fire insurance maps dated 1897, 1903, 1909, 1915, 1924, 1930, and 1962 were provided by EDR, and reviewed for evidence of past land use. Fire insurance maps are included in Appendix E.

The Sanborn Map from 1897 depicts three railroad spurs that traverse from the main railway west of the subject property that travel east toward the subject property. The southernmost spur runs along the northern border of the subject property. The subject property is vacant in the 1897 Sanborn Map. J.T. and K.W. Railroad Shops are located to the west and dwellings are north of the subject property at this time. The Sanborn Map from 1903 is similar to that from 1897, except a couple buildings are located just north of the adjoining railroad spur. The only decipherable building label is a tool house.

By 1909, dwellings are shown south of the subject property. The parcel adjoining the northern side of the subject property contains a dwelling at this time and some of the railroad spur buildings have been removed. The Sanborn Map from 1915 is similar to the 1909 map, except dwellings have been constructed east and north of the subject property. A rail spur crossed the subject property, northeast corner. However, this map incorrectly depicts a rail spur crossing the property's northeast quarter. The rail spur is correctly drawn north of the property on the other Sanborn maps, including the time interval bracketing 1915. Additional evidence to support the rail spur placement north of the subject property is the arc shaped property line of the west adjoining property. The rail spur paralleled this line to the north on the other Sanborn maps. An oil house has also been constructed amongst the adjoining railroad spur lines, north of the subject property.

More dwellings have been constructed west of the subject property by 1924, according to the Sanborn Map. At this time, The Texas Co. is located approximately 230 feet north on a non-adjoining property with oil storage, a kerosene and gas tank, and an automotive garage. The subject property and the other surrounding properties have a similar configuration to 1915, except the rail spur is no longer shown crossing the subject property but instead traverses to the north.

Mullis Bro's Novelty Works, a wood working company, is located on the subject property according to the 1930 Sanborn Map. This company produced window and door frames, doors, sash, blinds, screens, auto truck bodies, and wood turnings. A wood working building was located on the northwest corner, an office was located on the northeast corner with a lumber shed directly southwest, and a warehouse was located in the center of the subject property. A railroad spur now runs southwest to northeast on the adjoining parcel, west of the subject property. Properties surrounding the subject property are similar to those seen in the 1924 Sanborn Map.

Cameron Company, a concrete product and building material facility, has been established by 1962 on the subject property and the adjoining parcel to the west. Two dwellings and an automotive garage are indicated on the northeast parcel within the subject property. A cement and building material warehouse is located on the north edge and a concrete products manufacturing building is on the west edge of the subject property. A welding room is on the south end of the concrete products building and an office is located in the center of the subject property. A saw and planing mill, two tool houses, and a storage building are located on the adjoining parcel to the west. The oil house and dwellings that were north of the subject property have been removed by 1962. Surrounding parcels are similar to what they were in 1930.

3.5.3 Property Tax Files

Ayres Associates accessed property tax and assessment records available through the Putnam County GIS Sales and Property Search website on August 9,

2016, to review the file maintained for the subject property. According to records, Ride Solutions owned the subject property since at least 1992. Copies of pertinent records and a parcel map are included in Appendix A.

3.5.4 Recorded Land Title Records

The environmental professional is responsible to undertake a review of recorded land title records and judicial records for environmental liens or AULs on behalf of EPA Brownfield Assessment and Characterization grantees. This section includes an evaluation of recorded land title records, provided by EDR.

An environmental lien search was provided by EDR on September 16, 2016, and the results were reviewed by Ayres Associates. Neither environmental liens nor other activity and use limitations are associated with either parcel located within the subject property. A certificate of name change was submitted by the former ARC Transit, Inc. on July 13, 1998. Their organization name was changed to Ride solution, Inc. Copies of pertinent records are included in Appendix D.

Putnam County Property Appraisers has online records of sales going back to 1992. Cameron Company, Inc. sold the subject property to ARC Transit, Inc. in December 1992. ARC Transit, Inc. formally changed their company name to Ride Solution Inc. in 1998.

3.5.5 USGS Topographic Maps

USGS topographic maps dated 1912, 1915, 1968, 1980, 1983, 1989, and 2012 were provided by EDR and reviewed by Ayres Associates for evidence of past land use. Copies of topographic maps are included in Appendix E.

Three railroad spurs run directly north of the subject property in the 1912 topographic map. Some buildings are shown south, northeast, and north of the subject property at this time. The topographic map from 1915 is similar to the 1912 map.

By 1968, the surrounding buildings from 1912/1915 are not represented. Campbell School is northeast of the subject property in the 1968 topographic map. The topographic maps from 1980 to 1989 are similar to the map from 1968. By 2012, the format of the topographic map has changed and buildings are not represented.

3.5.6 Local Street Directories

City directories have been published for U.S. cities and towns since the 18th century and provide a record of changes in property occupancy at specific locations. Review of historical city directories, therefore, allows for the evaluation of potential liabilities on a property resulting from past activities.

Historical city directories provided by EDR were reviewed by Ayres Associates to identify historical occupants of the subject property and any suspect adjoining

properties. The following table summarizes city directory search results. Copies of city directory pages are included in Appendix E.

Year	Subject Property – 310 South 10th Street (Historically 300/302 S. 10th St.)
1936	<i>Subject Property:</i> 300 S 10 th St – Mullis Bro’s Mill Work <i>Adjoining Properties:</i> No Relevant Listings
1948	<i>Subject Property:</i> 300 S 10 th St – Campbell J.W. Inc. <i>Adjoining Properties:</i> 315 S 10 th St – Southland Packing Co.
1954	<i>Subject Property:</i> 300 S 10 th St – Campbell J.W. Inc. (Warehouse) <i>Adjoining Properties:</i> No Relevant Listings
1959	<i>Subject Property:</i> 310 S 10 th St – Cameron Co. <i>Adjoining Properties:</i> No Relevant Listings
1964	<i>Subject Property:</i> 310 S 10 th St – Cameron Co. (building supply) <i>Adjoining Properties:</i> No Relevant Listings
1969	<i>Subject Property:</i> 310 S 10 th St – Cameron Co. Inc. (building supply) <i>Adjoining Properties:</i> No Relevant Listings
1974	<i>Subject Property:</i> 302 S 10 th St – Cameron Co. (storage) 310 S 10 th St – Cameron Co. Inc. (building supply) <i>Adjoining Properties:</i> No Relevant Listings
1978	<i>Subject Property:</i> 302 S 10 th St – Cameron Co. (storage) 310 S 10 th St – Cameron Co. Inc. (building supplies) <i>Adjoining Properties:</i> No Relevant Listings

1982	<p><i>Subject Property:</i> 302 S 10th St – Cameron Co. (storage) 310 S 10th St – Cameron Co. Inc. (building supplies)</p> <p><i>Adjoining Properties:</i> No Relevant Listings</p>
1989	<p><i>Subject Property:</i> 310 S 10th St – Vacant</p> <p><i>Adjoining Properties:</i> No Relevant Listings</p>
1992	<p><i>Subject Property:</i> 310 S 10th St – Not Listed</p> <p><i>Adjoining Properties:</i> 1100 Carr St – Creative Screens Inc.</p>
1995	<p><i>Subject Property:</i> 310 S 10th St – ARC Transit Inc.</p> <p><i>Adjoining Properties:</i> 1100 Carr St – Creative Screens Inc.</p>
1999	<p><i>Subject Property:</i> 310 S 10th St – ARC Transit Incorporated</p> <p><i>Adjoining Properties:</i> No Relevant Listings</p>
2003	<p><i>Subject Property:</i> 310 S 10th St – Ride Solution Inc.</p> <p><i>Adjoining Properties:</i> No Relevant Listings</p>
2008	<p><i>Subject Property:</i> 310 S 10th St – Ride Solution Inc.</p> <p><i>Adjoining Properties:</i> 1100 Carr St –Synergy Electric</p>
2013	<p><i>Subject Property:</i> 310 S 10th St – Ride Solution Inc.</p> <p><i>Adjoining Properties:</i> 1100 Carr St –Synergy Fabrications LLC.</p>

3.5.7 Building Department Records

Ayres Associates submitted a request to review any permits to construct, alter, or demolish buildings at the subject property with the Palatka Building Department on September 14, 2016. As of the printing of this report, Ayres Associates has not received a response.

3.5.8 Zoning and Land Use Records

Ayres Associates reviewed land use and zoning records available through the Putnam County Property Appraiser website. The property is zoned C-2 for commercial in the downtown business district. Parcel 42-10-27-6850-1600-0010 has use code (02), which identifies it as a bus terminal. Parcel 42-10-27-1600-0011 has use code (10), which identifies it as vacant commercial land. A copy of the Property Record Cards obtained from the Appraiser website is included in Appendix A.

3.5.9 Other Historical Sources

Other historical sources were not reviewed by Ayres Associates.

4.0 Site Reconnaissance

On August 23, 2016, Scott Wilson of Ayres Associates visited the subject property. Boyd Thompson, the owner of Ride Solution Inc. (PID# 42-10-27-6850-1600-0010 and 42-10-27-6850-1600-0011), accompanied Ayres Associates during the site reconnaissance visit. The subject property was observed by walking the property lines and viewing interior areas. The weather was hot, humid, and sunny with calm winds. Photographs taken during the site visit are included in Appendix F.

4.1 General Site Setting

4.1.1 Current Use(s) of the Subject Property

Ride Solutions Inc. is a non-profit transit agency which provides a full spectrum of Community Transportation services, including scheduled, county-wide public transportation, multi-model connections, human service agency and student transportation, van pool commuter services, and non-emergency wheelchair and stretcher transportation. Ride Solution began its operations in 1986 as ARC Transit. This parcel has been used in this capacity since 1992. Due to the diffused population and rural nature of Putnam County, adequate public transportation is difficult to accomplish. As such, a secondary goal of Ride Solution is to address rural transportation issues. The transportation means are buses of various sizes and shapes that best fit the needs of the population it serves in Putnam County. Recently, bus design and manufacturing has become a way Ride Solution is helping improve community transportation. The Brevi Bus was created to handle the rugged terrain and unpaved roads of rural Putnam County. The Bus was designed locally by Ride Solution and is expected to improve access by 30 percent.

4.1.2 Past Use(s) of the Subject Property

Based on Sanborn fire insurance maps, the majority of the subject property was undeveloped prior to 1924 with rail spurs to the north. The property's use changed to industrial between 1924 and 1930 when Mullis Bro's Novelty Works constructed a wood working facility on the property. The facility included: a woodworking shop, a warehouse, a lumber shed and an office. The maps indicate that the facility was served by rail lines on north adjoining property. Between 1936 and 1948, the property use changed to commercial when Campbell J.W. Inc. took over occupancy of the property and began operating a warehouse on the property. Around 1959, the property used changed back to industrial when it was occupied by Cameron Company, a concrete product and building material facility. By 1962, two dwellings and an automotive garage are indicated on the northeast parcel of the subject property. The larger parcel contained a cement and building material warehouse in the north and a concrete products manufacturing building in the west. A welding room was located in the south end of the concrete products building and an office was located in the center of the subject property. Cameron Company vacated the property between 1982 and 1989. ARC Transit, the predecessor of Ride

Solutions, purchased the property in 1991 and started operating a non-profit community bus transit service. Operations included the repair, maintenance, and storage of buses. In 1998, the company changed its name to Ride Solution, Inc. but continued with the same operations. Inc.

4.1.3 Current Uses of Adjoining Properties

The current uses of adjoining properties are identified in the following table.

Direction	Use
North	A vacant city-owned parcel is located immediately north of the subject parcel, just beyond the City right-of-way which runs east to west between the two parcels.
South	Residential parcels and homes occupy most of the developed land immediately south of the subject parcel. Several personal storage units also reside across the street from the southwestern corner of the subject property.
East	Residential parcels and homes occupy most of the developed land immediately east of the subject parcel.
West	Immediately west of the subject parcel is a business called Synergy which provides equipment for commercial and residential construction.

4.1.4 Past Uses of Adjoining Properties

The property immediately west and north of the subject property has contained railroad operations since 1897. In recent history, the parcel adjoining the subject property to the west has been used as a concrete product and building material company and an equipment rental facility. Parcels to the east and south have historically been mostly residential.

4.1.5 Current or Past Uses in the Surrounding Area

The residential homes and lots in the South Historic District have been in existence for many generations and are still occupied and maintained south and east of the subject property. Some commercial properties are also in the area surrounding the subject property.

4.1.6 Geologic, Hydrogeologic, Hydrologic and Topographic Conditions

The physical setting of the subject property and surrounding area is described in Section 3.4. Based on review of physical setting sources and observations during site reconnaissance, a release of petroleum or hazardous substances in the area is likely to follow hydraulic gradient southeast toward the St. Johns River. A release to the surface of the subject property that does not permeate soil is also likely to migrate in a southerly direction, however, the topographic contours of the subject parcel is very flat with little surface variability.

4.1.7 General Description of Structures

There are four main buildings on the subject property. One large building that is rectangular in shape and extends in an east-west orientation, is used to store miscellaneous bus parts, personal items, and items for future reuse and recycling of site operations fluids such as empty 55-gallon containers. A very large vehicle maintenance building with high roofline is on the western center of the property. This building is where the bus maintenance and rebuilding takes place. Another rectangular building along the southern perimeter is an open air building with its primary focus used to work on the exterior of the buses and also for cleaning of the inside of the buses under the protection of roof and overhang. The fourth building is located in the center east of the property. This building contains some office space for Ride Solution Inc. staff, and also serves as a lounge area for the drivers and bus mechanics.

4.1.8 Roads

Carr Street bounds the subject property on the south end, S 10th St along the eastern perimeter, and right-of-way borders the property on its western border and northern border with no roads in either corridor.

4.1.9 Potable Water Supply

The City of Palatka provides potable water service to the property.

4.1.10 Sewage Disposal System

The City of Palatka Municipal Sewerage Utility serves the subject property.

4.2 Interior and Exterior Observations

4.2.1 Current Use(s) of the Subject Property

ARC Transit, Inc. and later Ride Solutions, Inc., as a non-profit transit company, use the property as facility in which to provide bus transit for student and human services needs in rural Putnam County. They not only provide the transit that is needed, but also provide bus repair, and also to build unique buses required to navigate the low-lying undeveloped rural areas of Putnam County.

4.2.2 Past Use(s) of the Subject Property

The general past use of the subject property is described in Section 4.1.2. It was apparent that the subject property has been used as a large transit facility as the buildings and equipment on the premises appear to be constructed to meet the needs of a company with large vehicles requiring storage and maintenance.

4.2.3 Hazardous Substances and Petroleum Products

Used oil is collected safely in an above ground container beside the bus maintenance garage. The waste oil is pumped from the tank on demand by a local contractor for future reuse and recycling. Based on the property's current use as a repair and maintenance facility, it is likely to store and use solvents.

4.2.4 Storage Tanks

Five ASTs were observed during the site visit. Two 500-gallon tanks contained unleaded gasoline two other 500-gallon tanks contained diesel fuel. The fifth tank is a used oil tank next to the bus maintenance garage. The used oil is routinely pumped from the tank by a local petroleum recycler. Although there was not any secondary containment, neither spillage or odors were noted in the vicinity of the tanks. The tanks appeared to be well-maintained and cared for.

4.2.5 Odors

Strong, pungent, or noxious odors were not observed during site reconnaissance or indicated by interviews or record reviews.

4.2.6 Pools of Liquid

Pools of liquid were not observed during site reconnaissance or indicated by interviews or record reviews.

4.2.7 Drums

Dozens of empty plastic and metal 55-gallon drums were observed around the facility. Most the drums previously contained hydraulic, engine and brake oils. The drums have been emptied and stored awaiting pick up for recycling.

4.2.8 Unidentified Substance Containers

Dozens of unidentified, plastic, 55-gallon substance containers were observed during site reconnaissance and indicated by interviews. Many of them were used to originally contain hydraulic fluids and engine oils and have been emptied and stored awaiting a recycle pickup for their reuse.

4.2.9 Polychlorinated Biphenyls (PCBs)

Equipment or containers likely to contain PCBs were not observed during site reconnaissance or indicated by interviews or record reviews.

4.3 Interior Observations

4.3.1 Heating and Cooling

There was no cooling system observed in the main repair and storage buildings but there was A/C inside the main office building and driver lounge area. Heating appeared to be forced air electric heat.

4.3.2 Stains or Corrosion

Little to no staining or corrosion was observed in the maintenance building and repair shops. The floors were remarkably clean of oils and relatively stain free. All the metal surfaces were in good condition and corrosion was not apparent.

4.3.3 Drains and Sumps

Floor drains were observed in the inside and outside vehicle repair and maintenance facilities. They are presumed to drain to the municipal sewer system.

4.4 Exterior Observations

4.4.1 Pits, Ponds or Lagoons

None were observed.

4.4.2 Stained Soil or Pavement

De minimis petroleum staining was noted around the waste oil AST.

4.4.3 Stressed Vegetation

None was observed although there was very little vegetation on the property to observe.

4.4.4 Solid Waste

The facility was well cared for and maintained and general refuse was stored in on-site dumpsters.

4.4.5 Wastewater

Evidence of wastewater discharge into a drain, ditch, underground injection system or stream on or adjacent to the subject property was not observed during the site reconnaissance or indicated by interviews and record reviews. Storm water travels east to S 10th St before discharging to through drop inlets to the municipal storm sewer system.

4.4.6 Wells

Neither monitoring wells nor on-site potable water supply wells were observed on the subject property.

4.4.7 Septic Systems

None were reported or observed to be present.

5.0 Interview Summaries

5.1 Past and Present Owners and Occupants

Boyd Thompson, Director, Ride Solution Inc., was interviewed by Scott Wilson during the site visit. Mr. Thompson has been with Ride Solution and its predecessor for several decades. Ride Solutions is a non-profit company that utilizes Medicare funding to provide transportation service to underprivileged, infirmed, and elderly in Putnam County. Buses are routinely repaired, maintained, and operated from that facility.

According to Mr. Thompson, the property functions as a storage, repair, maintenance, and transport operations facility. There are five ASTs on the property. Two 500-gallon gasoline fuel tanks and two 500-gallon diesel fuel tanks. The fifth is a used oil tank next to the bus maintenance garage. The used oil is routinely pumped out by a local petroleum recycler.

Between October 4 and 19, 2016, Ayres Associates attempted to contact Mr. Thompson several times with questions regarding a past release of diesel fuel identified on the ERNS database. As of the printing of this report, neither Mr. Thompson nor any other Ride Solution staff have responded to e-mails or phone calls.

5.2 State and Local Government Officials

Ms. Mandi Tucker, Resource Coordinator, City of Palatka, was interviewed via phone and site during site reconnaissance. Ms. Tucker indicated that the property was previously used as bus terminal and garage, but did not have any knowledge relating use or storage of hazardous materials or petroleum at the property.

Mr. Keith Grimes, Fire Marshall, Palatka Fire Department, was interviewed via phone on September 15, 2016. According to Mr. Grimes, the department does not have any records of hazardous substances or releases at the subject property. However, he did confirm that the property is used as a bus terminal.

5.3 Others

No others were interviewed during this assessment.

6.0 Non-Scope Services

Additional services or recommendations were not requested by the User. Recommendations are not required under ASTM Practice E1527-13 but may be provided upon request.

7.0 Evaluation

7.1 Summary of Findings

The following summary of findings is based on a site reconnaissance to view the subject property and adjoining properties, review of environmental and historical records, and interviews conducted during the preparation of this Phase I ESA report:

- The subject property contains two parcels covering is 2.07 acres in the Southwest $\frac{1}{4}$ of Section 42, Township 10 South, Range 27 East, in the City of Palatka, Putnam County, Florida. The subject property has a physical address of 310 S 10th St. The property is identified by parcel numbers 42-10-27-6850-1600-0010 and 42-10-27-6850-1600-0011 with legal descriptions of “DICKS MAP OF PALATKA MB2 P46, BLK 160 (EX BK201 P205) + PT, OF ADJ CLOSED ELEVENTH ST, OR272 P173” and “DICKS MAP OF PALATKA MB2 P46, BLK 160 N 100FT OF E 100FT OF, BLK BK201 P205 + PT OF ADJ, CLOSED ELEVENTH ST OR272 P173”, respectively.
- There are four main buildings on the subject property. One approximately 2,000-square-foot (ft²) building that is rectangular and is orientated east-west, is used to store bus parts, personal items, and items for future reuse from site operations such as empty 55-gallon containers. This building was constructed around 1955. An approximately 9,000-ft² vehicle maintenance building was constructed in 1998 and located on the western center of the property. This building is where the bus maintenance and rebuilding takes place. An approximate 3,000-ft² rectangular building along the southern perimeter is an open air building with its primary focus used to work on the exterior of the buses, and also for cleaning of the inside of the buses under the protection of roof and overhang. This building was constructed between 1980 and 1994. The fourth building is approximately 1,617-ft², constructed in 1955, and contains offices and the drivers lounge. This building is located in the center east of the property. There was no cooling system observed in the main repair and storage buildings, but there was A/C inside the main office building and driver lounge area. Heating appeared to be forced air electric heat. The property is connected to municipal sewer and water service.
- Ride Solutions Inc. is the current occupant of the subject property. They are a non-profit transit agency which provides transportation services, including scheduled, county-wide public transportation, multi-modal connections, human service agency and student transportation, van pool commuter services, non-emergency wheelchair and stretcher transportation. Ride Solution began its operations in 1986 as ARC Transit. This property has been used in this capacity since 1992.
- Based on Sanborn fire insurance maps, the majority of the subject property was undeveloped prior to 1924 with rail spurs to the north. The property’s use changed to industrial between 1924 and 1930 when Mullis Bro’s Novelty Works constructed a wood working facility on the property. The facility included: a woodworking shop, a warehouse, a lumber shed, and an office. The maps indicate that the facility was served by rail lines on north adjoining property. Between 1936 and 1948, Campbell

J.W. Inc. took over occupancy of the property and was operating a warehouse on the property. Around 1959, the property was occupied by Cameron Company, a concrete product and building material facility. By 1962, two dwellings and an automotive garage are indicated on the northeast parcel of the subject property. The larger parcel contained a cement and building material warehouse in the north and a concrete products manufacturing building in the west. A welding room was located in the south end of the concrete products building and an office was located in the center of the subject property. Cameron Company vacated the property between 1982 and 1989. ARC Transit, the predecessor of Ride Solutions, purchased the property in 1991 and started operating a non-profit community bus transit service. Operations included the repair, maintenance, and storage of buses. In 1998, the company changed its name to Ride Solution, Inc. but continued with the same operations.

- Dozens of empty plastic and metal 55-gallon drums were observed around the facility. Most the drums previously contained hydraulic oil, engine oil, and brake fluids. The drums are empty and stored for pick up or reuse.
- Five aboveground storage tanks (ASTs) were observed during the site visit. Two 500-gallon tanks contained unleaded gasoline and two 500-gallon tanks contained diesel fuel. The fifth tank is a used oil tank next to the bus maintenance garage. The used oil is routinely pumped from the tank by a local petroleum recycler.
- *De minimis* petroleum staining was noted on the property, including near the waste oil AST.
- The subject property is identified on several environmental databases including the emergency release notification system (ERNS), leaking underground storage tank (LUST), underground storage tank (UST), and AST.
 - The subject property is identified on the ERNS database as 310 S 10th St and by site ID 2005770090. On August 23, 2005, the National Response Center received notification that diesel fuel spilled onto the ground while a bus was refueling from an AST on the property. The size of the spill was not provided on the Facility Detail Report provided by EDR.
 - The subject property is identified on the LUST database as “Cameron Co.” (Facility ID 8515709). On July 3, 1991, the Florida Department of Environmental Protection (FDEP) received notification that petroleum contamination was discovered during the closure of two 2,000-gallon USTs. In 1994, the FDEP closed the LUST investigation after reviewing data from a Phase II ESA. Based on the regulatory status, this petroleum release was addressed to the satisfaction of the applicable regulatory authority without the use of continuing obligations involving engineering or institutional controls.
 - “Cameron Co.” is identified as the owner of a two removed 2,000-gallon leaded gasoline and vehicular diesel USTs and a 750-gallon unleaded gasoline AST at 310 S 10th St (Facility ID 8515709). According to the FDEP storage tank database, the USTs and AST were removed on July 31, 1991, and June 30, 1988,

respectively. None of the five current ASTs at the facility appear to be registered.

- No adjoining properties are listed on standard environmental databases. Additional properties in the area appear unlikely to result in a recognized environmental condition (REC) on the subject property based on review of standard environmental records.
- The 1915 Sanborn fire insurance map incorrectly depicts a rail spur crossing the property's northeast quarter. The rail spur is correctly drawn north of the property on both the 1909 and 1924 Sanborn maps. Additionally, the shape of the west adjoining property line indicates the rail spur ran north of the subject property. The arc shaped, northeast/southwest trending property line parallels the rail spur as shown on 1897, 1903, 1909, 1924, 1930, and 1962 fire insurance maps.

7.2 Conclusions and Opinions

We have performed a Phase I Environmental Site Assessment in conformance with the scope and limitations of ASTM Practice E1527-13 of 310 South 10th Street, Palatka, F, the subject property. Any exceptions to, or deletions from, this practice are described in Section 1.6 of this report. This assessment has revealed no evidence of recognized environmental conditions in connection with the subject property except for the following:

7.2.1 Recognized Environmental Conditions

- On August 23, 2005, the National Response Center received notification that an unspecified amount of diesel fuel spilled onto the ground while a bus was refueling from an AST on the subject property. The documented release of a petroleum product on the subject property is considered a REC.

7.2.2 Controlled Recognized Environmental Conditions

- Controlled RECs have not been identified by this assessment.

7.2.3 Historical Recognized Environmental Conditions

- The subject property is identified on the LUST database as "Cameron Co." (Facility ID 8515709). The DEP was notified when petroleum contamination was discovered during the closure of two 2,000-gallon USTs for gasoline and diesel fuel in 1991 but closed the LUST case after reviewing data from a Phase II ESA. Both tanks were located southwest of the vehicle maintenance building. Based on the regulatory status, this petroleum release was addressed to the satisfaction of the applicable regulatory authority without the use of continuing obligations and is considered an HREC.

7.3 Additional Information

7.3.1 Data Gaps

A data gap is considered the inability to obtain information required by ASTM E1527-13 despite good faith efforts by Ayres Associates to gather such information. The following data gaps were identified during the preparation of this Phase I ESA:

- Ayres Associates was unable to determine all uses of the subject property from 1924 to 1930, 1936 to 1948 and from 1983 to 1989. The absence of historical sources indicating development during these intervals is considered a data gap but is not anticipated to significantly limit the conclusions of this Phase I ESA.

7.3.2 Business Environmental Risks

Business Environmental Risks are risks which can have a material environmental or environmentally-driven impact on the business associated with the current or planned use of a parcel of commercial real estate, not necessarily limited to those environmental issues required to be investigated in this practice.

- Due to the age of the former warehouse on the north edge and the office on the east portion on the subject property, there is a possibility that these structures have asbestos containing materials (ACMs) and/or lead-bearing paint. The cost to inspection and abate lead paint and/or ACM prior to renovation or demolition activities is considered a BER.

7.3.3 Additional Investigation

This section is included to provide an opinion in the unusual circumstance that greater certainty is required regarding the RECs identified by this Phase I ESA. Inclusion of such an opinion does not render the assessment incomplete, nor does it constitute a recommendation for a Phase II ESA or other assessment activities.

- On August 23 2005, the National Response Center received notification that diesel fuel spilled onto the ground while a bus was refueling from an AST on the property. Ayres Associates was unable to determine the size of the spill from a review of ERNS database, DEP records or Fire Department Records. Additional investigation is needed to determine the volume and location of release and what action, if any, was taken to clean up the spill.

Acknowledgement

On behalf of the City of Palatka, FL, Ayres Associates would like to extend its sincere appreciation to the U.S. Environmental Protection Agency (USEPA) for their funding support and to the FDEP for their technical assistance. The U.S. EPA Brownfield Site Assessment Grant Program not only graciously awarded the City of Palatka this grant to assist in funding the environmental activities outlined in this report, but has continued to support the City's efforts as they move toward redevelopment. Without this funding support, this Brownfield site may have laid idle indefinitely. We are indebted to the U.S. EPA for making financial assistance available for this important redevelopment project.

7.5 Environmental Professional Statement

I declare that, to the best of my professional knowledge and belief, I meet the definition of Environmental Professional as defined in § 312.10 of 40 CFR § 312.

I have the specific qualifications based on education, training, and experience to assess a property of the nature, history, and setting of the subject property. I have developed and performed the all appropriate inquiries in conformance with the standards and practices set forth if 40 CFR Part 312.

Appendix B
Scope of Services & User-provided Information

Scope of Services

Ayres Associates will conduct a Phase I ESA following guidelines presented in ASTM E1527-13 *Standard Practices for Environmental Site Assessments: Phase I ESA Process*. The following services will be provided:

- Research the property history to identify current and past activities conducted on site, and review information provided by the site owner such as an abstract of title, site plans, list of current and past tenants, and previous environmental reports.
- Contact the City, County, and/or State to review available historic aerial photographs for evidence of past activities and identification of potential environmental conditions.
- Conduct a site reconnaissance visit of the property to identify items of potential environmental concern.
- Contact the Florida Department of Environmental Protection (FDEP) staff to determine environmental conditions on the subject property and adjacent properties.
- Review FDEP documents and databases to locate known hazardous waste sites and hazardous waste treatment, storage, and disposal facilities within 1-mile of the property; registered landfills and waste disposal sites; leaking underground storage tanks within 0.5-mile of the property; hazardous substance spills; registered aboveground storage tanks and underground storage tanks; and hazardous waste handling facilities on the subject property or adjoining properties.
- Review United States Environmental Protection Agency (EPA) databases including the NPL and CERCLIS.
- Contact the local fire department and County personnel, as appropriate, to further research the history of the property.
- Prepare and submit one copy of the Phase I ESA report. The report will include photographs, supporting documentation, findings, and conclusions. A CD of the report will also be provided.

An ASTM E 1527-13 ESA does not include an asbestos inspection, asbestos sampling, mold sampling, analyzing drinking water or painted surfaces for lead content, a naturally occurring radioactive materials (NORM) survey, wetlands survey, or any other environmental sampling or testing (e.g., soil, water, air, or building materials).

**ASTM Practice E1527-13
USER QUESTIONNAIRE**

INTRODUCTION

In order to qualify for one of the *Landowner Liability Protections (LLPs)*¹ offered by the Small Business Liability Relief and Brownfields Revitalization Act of 2001 (the "*Brownfields Amendments*")², the *user* must provide the following inquiries required by 40 CFR 312.25, 312.28, 312.29, 312.30 and 312.31. These inquiries must also be conducted by EPA Brownfield Assessment and Characterization grantees. The *user* should provide the following information to the *environmental professional*. Failure to provide this information could result in a determination that "*all appropriate inquiries*" is not complete.

- (1) **Environmental liens that are filed or recorded against the *property* (40 CFR 312.25).**
Did a search of *recorded land title records* (or judicial records where appropriate³) identify any environmental liens filed or recorded against the *property* under federal, tribal, state or local law?
Unknown

- (2) **Activity and land use limitations (AULs) that are in place on the *property* or that have been filed or recorded against the *property* (40 CFR 312.26(a)(1)(v) and (vi)).**
Did a search of *recorded land title records* (or judicial records where appropriate³) identify any AULs, such as *engineering controls*, land use restrictions or *institutional controls* that are in place at the *property* and/or have been filed or recorded against the *property* under federal, tribal, state or local law?
Unknown

- (3) **Specialized knowledge or experience of the person seeking to qualify for the LLP (40 CFR 312.28).**
Do you have any specialized knowledge or experience related to the *property* or nearby properties? For example, are you involved in the same line of business as the current or former *occupants* of the *property* or an *adjoining property* so that you would have specialized knowledge of the chemicals and processes used by this type of business?
Unknown

- (4) **Relationship of the purchase price to the fair market value of the *property* if it were not contaminated (40 CFR 312.29).**
Does the purchase price being paid for this *property* reasonably reflect the fair market value of the *property*? If you conclude that there is a difference, have you considered whether the lower purchase price is because contamination is known or believed to be present at the *property*?
Unknown

- (5) **Commonly known or *reasonably ascertainable* information about the *property* (40 CFR 312.30).**
Are you aware of commonly known or *reasonably ascertainable* information about the *property* that would help the *environmental professional* to identify conditions indicative of releases or threatened releases? For example,
 - a). Do you know the past uses of the *property*?
The lot is currently a bus terminal with a garage on site
 - b). Do you know the specific chemicals that are present or once were present at the *property*?
Unknown
 - c). Do you know of spills or other chemical releases that have taken place at the *property*?
Unknown
 - d). Do you know of any environmental cleanups that have taken place at the *property*?
Unknown

- (6) **The degree of obviousness of the presence or likely presence of contamination at the *property*, and the ability to detect the contamination by appropriate investigation (40 CFR 312.31).**
Based on your knowledge and experience related to the *property* are there any *obvious* indicators that point to the presence or likely presence of contamination at the *property*?
Unknown

Additional Information

In addition, certain information should be collected, if available, and provided to the *environmental professional* selected to conduct the *Phase I Environmental Site Assessment*. This information is intended to assist the *environmental professional*, but is not necessarily required to qualify for one of the LLPs. The information includes:

- a) Reason why the Phase I is being performed, to ascertain whether there is contamination at the site

- b) Type of *property* and type of *property* transaction, for example, sale, purchase, exchange, etc.
Property use: 0200: Bus Terminal
- c) Complete and correct address for the *property* (a map or other documentation showing *property* location and boundaries is helpful), PID 42-10-27-6850-1600-0010; 310 S 10th Street
- d) Scope of services desired for the Phase I (including whether any parties to the *property* transaction may have a required standard scope of services on whether any considerations beyond the requirements of Practice E 1527 are to be considered), Not Known

- e) Identification of all parties who will rely on the Phase I report, Ride Solution

- f) Identification of the site contact and how the contact can be reached, Boyd Thompson: boyd@theridesolution.org

- g) Any special terms and conditions which must be agreed upon by the *environmental professional*, Unknown

- h) Any other knowledge or experience with the *property* that may be pertinent to the *environmental professional* (for example, copies of any available prior *environmental site assessment reports*, documents, correspondence, etc., concerning the *property* and its environmental condition). None known

EXECUTIVE SUMMARY

A search of available environmental records was conducted by Environmental Data Resources, Inc (EDR). The report was designed to assist parties seeking to meet the search requirements of EPA's Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), the ASTM Standard Practice for Environmental Site Assessments (E 1527-13) or custom requirements developed for the evaluation of environmental risk associated with a parcel of real estate.

SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified in the following databases.

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property. Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in ***bold italics*** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

STANDARD ENVIRONMENTAL RECORDS

Federal CERCLIS NFRAP site list

SEMS-ARCHIVE: SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes

EXECUTIVE SUMMARY

available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that, based upon available information, the location is not judged to be potential NPL site.

A review of the SEMS-ARCHIVE list, as provided by EDR, and dated 03/07/2016 has revealed that there is 1 SEMS-ARCHIVE site within approximately 0.5 miles of the target property.

Federal RCRA generators list

RCRA-CESQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Conditionally exempt small quantity generators (CESQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month.

A review of the RCRA-CESQG list, as provided by EDR, and dated 12/09/2015 has revealed that there are 4 RCRA-CESQG sites within approximately 0.25 miles of the target property.

State and tribal landfill and/or solid waste disposal site lists

SWF/LF: The Solid Waste Facilities/Landfill Sites records typically contain an inventory of solid waste disposal facilities or landfills in a particular state. The data come from the Department of Environmental Protection's Facility Directory (Solid Waste Facilities).

A review of the SWF/LF list, as provided by EDR, has revealed that there are 4 SWF/LF sites within approximately 0.5 miles of the target property.

LAST: The file for Leaking Aboveground Storage Tanks. Please remember STCM does not track the source of the discharge so the agency provides a list of facilities with an aboveground tank and an open discharge split by facilities with aboveground tanks only and facilities with aboveground and underground tanks.

A review of the LAST list, as provided by EDR, and dated 05/02/2016 has revealed that there is 1 LAST site within approximately 0.5 miles of the target property.

State and tribal registered storage tank lists

UST: The Underground Storage Tank database contains registered USTs. Shortly after the September 11 event, the DEP was instructed to remove the detail about some of the storage tank facilities in the state from their reports. Federal-owned facilities and bulk storage facilities are included in that set.

A review of the UST list, as provided by EDR, has revealed that there are 13 UST sites within

EXECUTIVE SUMMARY

approximately 0.25 miles of the target property.

AST: Shortly after the Sept 11 event, the DEP was instructed to remove the detail about some of the storage tank facilities in the state from their reports. Federal-owned facilities and bulk storage facilities are included in that set.

A review of the AST list, as provided by EDR, has revealed that there are 2 AST sites within approximately 0.25 miles of the target property.

ADDITIONAL ENVIRONMENTAL RECORDS

Local Brownfield lists

US BROWNFIELDS: The EPA's listing of Brownfields properties from the Cleanups in My Community program, which provides information on Brownfields properties for which information is reported back to EPA, as well as areas served by Brownfields grant programs.

A review of the US BROWNFIELDS list, as provided by EDR, and dated 03/21/2016 has revealed that there is 1 US BROWNFIELDS site within approximately 0.5 miles of the target property.

Other Ascertainable Records

RCRA NonGen / NLR: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

A review of the RCRA NonGen / NLR list, as provided by EDR, and dated 12/09/2015 has revealed that there are 3 RCRA NonGen / NLR sites within approximately 0.25 miles of the target property.

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR MGP: The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

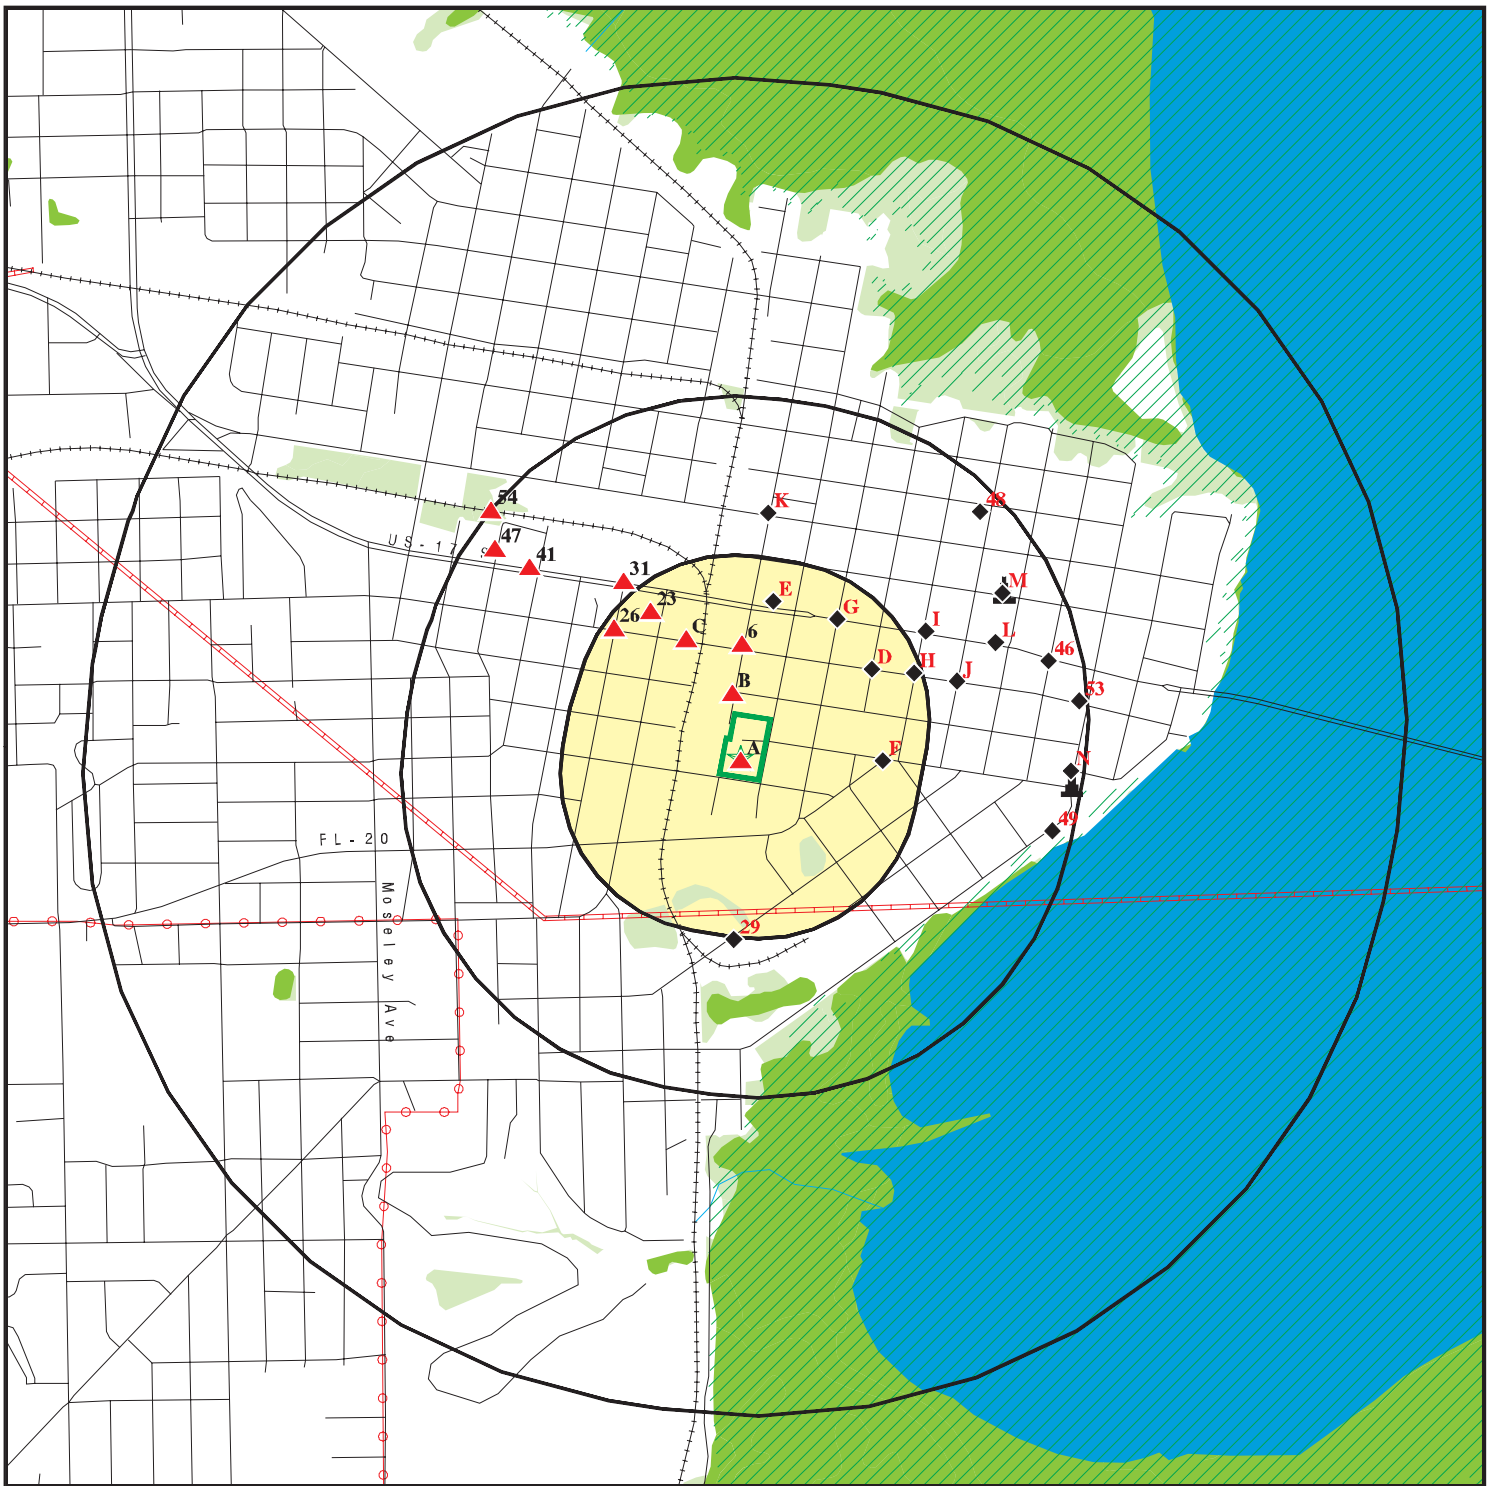

A review of the EDR MGP list, as provided by EDR, has revealed that there are 2 EDR MGP sites within approximately 1 mile of the target property.

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Florida Environmental System Today Application (FIESTA) Data Maintenance (FDM) system maintains entity, environmental interest and affiliation data for the State of Florida.

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Florida Environmental System Today Application (FIESTA) Data Maintenance (FDM) system maintains entity, environmental interest and affiliation data for the State of Florida.

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Florida Environmental System Today Application (FIESTA) Data Maintenance (FDM) system maintains entity, environmental interest and affiliation data for the State of Florida.

FORMER DEE DEE BAR
1100 MADISON STREET
PALATKA, FL 32177
Site 1 of 2 in cluster K

US BROWNFIELDS 1012230930
N/A

Relative:
Lower

US BROWNFIELDS:

Recipient name: Florida Department of Environmental Protection
 Grant type: Section 128(a) State/Tribal

Actual:
17 ft.

Property name: FORMER DEE DEE BAR
 Property #: 42-10-27-6850-1990-0100
 Parcel size: .68

Property Description: The property was previously occupied by a gas station built before 1950. The former Dee Dee Bar operated on the site from the 1950's - 70's, but the site has been abandoned for over 20 years. It was bought off the tax rolls in 2006. The purchaser removed four USTs and later found evidence of two additional tanks which apparently remain. In 2008, the site was donated to the Florida Endowment Foundation for Florida's Graduates.

NO SITES FOUND					

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

Number of Days to Update: Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

STANDARD ENVIRONMENTAL RECORDS

Federal NPL site list

NPL: National Priority List

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

Date of Government Version: 03/07/2016	Source: EPA
Date Data Arrived at EDR: 04/05/2016	Telephone: N/A
Date Made Active in Reports: 04/15/2016	Last EDR Contact: 07/07/2016
Number of Days to Update: 10	Next Scheduled EDR Contact: 10/17/2016
	Data Release Frequency: Quarterly

Proposed NPL: Proposed National Priority List Sites

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

Date of Government Version: 03/07/2016	Source: EPA
Date Data Arrived at EDR: 04/05/2016	Telephone: N/A
Date Made Active in Reports: 04/15/2016	Last EDR Contact: 07/07/2016
Number of Days to Update: 10	Next Scheduled EDR Contact: 10/17/2016

NPL LIENS: Federal Superfund Liens

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

Federal Delisted NPL site list

Delisted NPL: National Priority List Deletions

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

Date of Government Version: 03/07/2016	Source: EPA

	Data Release Frequency: Varies

SEMS: Superfund Enterprise Management System

SEMS (Superfund Enterprise Management System) tracks hazardous waste sites, potentially hazardous waste sites, and remedial activities performed in support of EPA's Superfund Program across the United States. The list was formerly know as CERCLIS, renamed to SEMS by the EPA in 2015. The list contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). This dataset also contains sites which are either proposed to or on the National Priorities List (NPL) and the sites which are in the screening and assessment phase for possible inclusion on the NPL.

Number of Days to Update: 10	Next Scheduled EDR Contact: 10/31/2016
	Data Release Frequency: Quarterly

Federal CERCLIS NFRAP site list

SEMS-ARCHIVE: Superfund Enterprise Management System Archive

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that, based upon available information, the location is not judged to be potential NPL site.

Federal RCRA non-CORRACTS TSD facilities list

RCRA-TSDF: RCRA - Treatment, Storage and Disposal

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

State and tribal institutional control / engineering control registries

ENG CONTROLS: Institutional Controls Registry

The registry is a database of all contaminated sites in the state of Florida which are subject to engineering controls. Engineering Controls encompass a variety of engineered remedies to contain and/or reduce contamination, and/or physical barriers intended to limit access to property. ECs include fences, signs, guards, landfill caps, provision of potable water, slurry walls, sheet pile (vertical caps), pumping and treatment of groundwater, monitoring wells, and vapor extraction systems.

State and tribal Brownfields sites

BROWNFIELDS AREAS: Brownfields Areas Database

A "brownfield area" means a contiguous area of one or more brownfield sites, some of which may not be contaminated, that has been designated as such by a local government resolution. Such areas may include all or portions of community redevelopment areas, enterprise zones, empowerment zones, other such designated economically deprived communities and areas, and Environmental Protection Agency (EPA) designated brownfield pilot projects. This layer provides a polygon representation of the boundaries of these designated Brownfield Areas in Florida.

BSRA: Brownfield Site Rehabilitation Agreements Listing

The BSRA provides DEP and the public assurance that site rehabilitation will be conducted in accordance with Florida Statutes and DEP's Contaminated Site Cleanup Criteria rule. In addition, the BSRA provides limited liability protection for the voluntary responsible party. The BSRA contains various commitments by the voluntary responsible party, including milestones for completion of site rehabilitation tasks and submittal of technical reports and plans. It also contains a commitment by DEP to review technical reports according to an agreed upon schedule. Only those brownfield sites with an executed BSRA are eligible to apply for a voluntary cleanup tax credit incentive pursuant to Section 376.30781, Florida Statutes.

ADDITIONAL ENVIRONMENTAL RECORDS

Local Brownfield lists

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

US BROWNFIELDS: A Listing of Brownfields Sites

Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties takes development pressures off of undeveloped, open land, and both improves and protects the environment. Assessment, Cleanup and Redevelopment Exchange System (ACRES) stores information reported by EPA Brownfields grant recipients on brownfields properties assessed or cleaned up with grant funding as well as information on Targeted Brownfields Assessments performed by EPA Regions. A listing of ACRES Brownfield sites is obtained from Cleanups in My Community. Cleanups in My Community provides information on Brownfields properties for which information is reported back to EPA, as well as areas served by Brownfields grant programs.

EPA WATCH LIST: EPA WATCH LIST

EPA maintains a "Watch List" to facilitate dialogue between EPA, state and local environmental agencies on enforcement matters relating to facilities with alleged violations identified as either significant or high priority. Being on the Watch List does not mean that the facility has actually violated the law only that an investigation by EPA or a state or local environmental agency has led those organizations to allege that an unproven violation has in fact occurred. Being on the Watch List does not represent a higher level of concern regarding the alleged violations that were detected, but instead indicates cases requiring additional dialogue between EPA, state and local agencies - primarily because of the length of time the alleged violation has gone unaddressed or unresolved.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

2020 COR ACTION: 2020 Corrective Action Program List

The EPA has set ambitious goals for the RCRA Corrective Action program by creating the 2020 Corrective Action Universe. This RCRA cleanup baseline includes facilities expected to need corrective action. The 2020 universe contains a wide variety of sites. Some properties are heavily contaminated while others were contaminated but have since been cleaned up. Still others have not been fully investigated yet, and may require little or no remediation. Inclusion in the 2020 Universe does not necessarily imply failure on the part of a facility to meet its RCRA obligations.

RMP: Risk Management Plans

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

When Congress passed the Clean Air Act Amendments of 1990, it required EPA to publish regulations and guidance for chemical accident prevention at facilities using extremely hazardous substances. The Risk Management Program Rule (RMP Rule) was written to implement Section 112(r) of these amendments. The rule, which built upon existing industry codes and standards, requires companies of all sizes that use certain flammable and toxic substances to develop a Risk Management Program, which includes a(n): Hazard assessment that details the potential effects of an accidental release, an accident history of the last five years, and an evaluation of worst-case and alternative accidental releases; Prevention program that includes safety precautions and maintenance, monitoring, and employee training measures; and Emergency response program that spells out emergency health care, employee training measures and procedures for informing the public and response agencies (e.g the fire department) should an accident occur.

HIST FTTS: FIFRA/TSCA Tracking System Administrative Case Listing

A complete administrative case listing from the FIFRA/TSCA Tracking System (FTTS) for all ten EPA regions. The information was obtained from the National Compliance Database (NCDB). NCDB supports the implementation of FIFRA (Federal Insecticide, Fungicide, and Rodenticide Act) and TSCA (Toxic Substances Control Act). Some EPA regions are now closing out records. Because of that, and the fact that some EPA regions are not providing EPA Headquarters with updated records, it was decided to create a HIST FTTS database. It included records that may not be included in the newer FTTS database updates. This database is no longer updated.

Date of Government Version: 10/19/2006
Date Data Arrived at EDR: 03/01/2007
Date Made Active in Reports: 04/10/2007

UMTRA: Uranium Mill Tailings Sites

Uranium ore was mined by private companies for federal government use in national defense programs. When the mills shut down, large piles of the sand-like material (mill tailings) remain after uranium has been extracted from the ore. Levels of human exposure to radioactive materials from the piles are low; however, in some cases tailings were used as construction materials before the potential health hazards of the tailings were recognized.

US AIRS (AFS): Aerometric Information Retrieval System Facility Subsystem (AFS)

The database is a sub-system of Aerometric Information Retrieval System (AIRS). AFS contains compliance data on air pollution point sources regulated by the U.S. EPA and/or state and local air regulatory agencies. This information comes from source reports by various stationary sources of air pollution, such as electric power plants, steel mills, factories, and universities, and provides information about the air pollutants they produce. Action, air program, air program pollutant, and general level plant data. It is used to track emissions and compliance data from industrial plants.

FL Cattle Dip. Vats: Cattle Dipping Vats

From the 1910's through the 1950's, these vats were filled with an arsenic solution for the control and eradication of the cattle fever tick. Other pesticides, such as DDT, were also widely used. By State law, all cattle, horses, mules, goats, and other susceptible animals were required to be dipped every 14 days. Under certain circumstances, the arsenic and other pesticides remaining at the site may present an environmental or public health hazard.

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR MGP: EDR Proprietary Manufactured Gas Plants

The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

EDR Hist Auto: EDR Exclusive Historic Gas Stations

EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

EDR Hist Cleaner: EDR Exclusive Historic Dry Cleaners

EDR has searched selected national collections of business directories and has collected listings of potential dry cleaner sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include dry cleaning establishments. The categories reviewed included, but were not limited to dry cleaners, cleaners, laundry, laundromat, cleaning/laundry, wash & dry etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

Liquid Waste Transporter List

The Liquid Waste Transporter permit regulates the transportation of various types of liquid and solid waste, including hazardous waste, waste oil and oily waste waters, septic and grease trap waste, biomedical waste, spent radiator fluid, photo chemical waste, dry sewage sludge, and other types of non-hazardous industrial waste. The Liquid Waste Transporter permits needed to protect the environment and the public from improperly handled and transported waste.

OTHER DATABASE(S)

Depending on the geographic area covered by this report, the data provided in these specialty databases may or may not be complete. For example, the existence of wetlands information data in a specific report does not mean that all wetlands in the area covered by the report are included. Moreover, the absence of any reported wetlands information does not necessarily mean that wetlands do not exist in the area covered by the report.

CT MANIFEST: Hazardous Waste Manifest Data

Facility and manifest data. Manifest is a document that lists and tracks hazardous waste from the generator through transporters to a tsd facility.

Date of Government Version: 07/30/2013

Sensitive Receptors: There are individuals deemed sensitive receptors due to their fragile immune systems and special sensitivity to environmental discharges. These sensitive receptors typically include the elderly, the sick, and children. While the location of all sensitive receptors cannot be determined, EDR indicates those buildings and facilities - schools, daycares, hospitals, medical centers, and nursing homes - where individuals who are sensitive receptors are likely to be located.

AHA Hospitals:

Source: American Hospital Association, Inc.

Telephone: 312-280-5991

The database includes a listing of hospitals based on the American Hospital Association's annual survey of hospitals.

Medical Centers: Provider of Services Listing

Source: Centers for Medicare & Medicaid Services

Telephone: 410-786-3000

A listing of hospitals with Medicare provider number, produced by Centers of Medicare & Medicaid Services, a federal agency within the U.S. Department of Health and Human Services.

Nursing Homes

Source: National Institutes of Health

Telephone: 301-594-6248

Information on Medicare and Medicaid certified nursing homes in the United States.

Version Date:	2012

Northeast Map:	5652300 HASTINGS, FL
Version Date:	2012

EDR's GeoCheck Physical Setting Source Addendum is provided to assist the environmental professional in forming an opinion about the impact of potential contaminant migration.

Assessment of the impact of contaminant migration generally has two principal investigative components:

1. Groundwater flow direction, and
2. Groundwater flow velocity.

Groundwater flow direction may be impacted by surface topography, hydrology, hydrogeology, characteristics of the soil, and nearby wells. Groundwater flow velocity is generally impacted by the nature of the geologic strata.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW DIRECTION INFORMATION

Groundwater flow direction for a particular site is best determined by a qualified environmental professional using site-specific well data. If such data is not reasonably ascertainable, it may be necessary to rely on other sources of information, such as surface topographic information, hydrologic information, hydrogeologic data collected on nearby properties, and regional groundwater flow information (from deep aquifers).

TOPOGRAPHIC INFORMATION

Surface topography may be indicative of the direction of surficial groundwater flow. This information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

TARGET PROPERTY TOPOGRAPHY

General Topographic Gradient: General SE

SURROUNDING TOPOGRAPHY: ELEVATION PROFILES

Source: Topography has been determined from the USGS 7.5' Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

HYDROLOGIC INFORMATION

Surface water can act as a hydrologic barrier to groundwater flow. Such hydrologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Refer to the Physical Setting Source Map following this summary for hydrologic information (major waterways and bodies of water).

FEMA FLOOD ZONE

<u>Target Property County</u> PUTNAM, FL	FEMA Flood <u>Electronic Data</u> YES - refer to the Overview Map and Detail Map

NATIONAL WETLAND INVENTORY

<u>NWI Quad at Target Property</u> PALATKA	NWI Electronic <u>Data Coverage</u> YES - refer to the Overview Map and Detail Map
---	--

HYDROGEOLOGIC INFORMATION

Hydrogeologic information obtained by installation of wells on a specific site can often be an indicator of groundwater flow direction in the immediate area. Such hydrogeologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Site-Specific Hydrogeological Data*:

Search Radius:	1.25 miles
Status:	Not found

AQUIFLOW®

Search Radius: 1.000 Mile.

EDR has developed the AQUIFLOW Information System to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted by environmental professionals to regulatory authorities at select sites and has extracted the date of the report, groundwater flow direction as determined hydrogeologically, and the depth to water table.

<u>MAP ID</u>	<u>LOCATION FROM TP</u>	<u>GENERAL DIRECTION GROUNDWATER FLOW</u>
2	0 - 1/8 Mile North	N
5	1/4 - 1/2 Mile NNE	NE
6	1/4 - 1/2 Mile ENE	NE
8	1/2 - 1 Mile NW	NNE
A9	1/2 - 1 Mile ENE	NE
A10	1/2 - 1 Mile ENE	E
11	1/2 - 1 Mile NNE	WSW

For additional site information, refer to Physical Setting Source Map Findings.

* ©1996 Site-specific hydrogeological data gathered by CERCLIS Alerts, Inc., Bainbridge Island, WA. All rights reserved. All of the information and opinions presented are those of the cited EPA report(s), which were completed under a Comprehensive Environmental Response Compensation and Liability Information System (CERCLIS) investigation.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW VELOCITY INFORMATION

Groundwater flow velocity information for a particular site is best determined by a qualified environmental professional using site specific geologic and soil strata data. If such data are not reasonably ascertainable, it may be necessary to rely on other sources of information, including geologic age identification, rock stratigraphic unit and soil characteristics data collected on nearby properties and regional soil information. In general, contaminant plumes move more quickly through sandy-gravelly types of soils than silty-clayey types of soils.

GEOLOGIC INFORMATION IN GENERAL AREA OF TARGET PROPERTY

Geologic information can be used by the environmental professional in forming an opinion about the relative speed at which contaminant migration may be occurring.

ROCK STRATIGRAPHIC UNIT

Era: Cenozoic
System: Quaternary
Series: Holocene
Code: Qh (decoded above as Era, System & Series)

GEOLOGIC AGE IDENTIFICATION

Category: Stratified Sequence

Geologic Age and Rock Stratigraphic Unit Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - a digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

DOMINANT SOIL COMPOSITION IN GENERAL AREA OF TARGET PROPERTY

The U.S. Department of Agriculture's (USDA) Soil Conservation Service (SCS) leads the National Cooperative Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps. The following information is based on Soil Conservation Service STATSGO data.

Soil Component Name: CANDLER

Soil Surface Texture: sand

Hydrologic Group: Class A - High infiltration rates. Soils are deep, well drained to excessively drained sands and gravels.

Soil Drainage Class: Excessively. Soils have very high and high hydraulic conductivity and low water holding capacity. Depth to water table is more than 6 feet.

Hydric Status: Soil does not meet the requirements for a hydric soil.

Corrosion Potential - Uncoated Steel: LOW

Depth to Bedrock Min: > 60 inches

Depth to Bedrock Max: > 60 inches

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

Soil Layer Information							
Layer	Boundary		Soil Texture Class	Classification		Permeability Rate (in/hr)	Soil Reaction (pH)
	Upper	Lower		AASHTO Group	Unified Soil		
1	0 inches	5 inches	sand	Granular materials (35 pct. or less passing No. 200), Fine Sand.	COARSE-GRAINED SOILS, Sands, Clean Sands, Poorly graded sand.	Max: 20.00 Min: 6.00	Max: 6.00 Min: 4.50
2	5 inches	67 inches	sand	Granular materials (35 pct. or less passing No. 200), Fine Sand.	COARSE-GRAINED SOILS, Sands, Clean Sands, Poorly graded sand.	Max: 20.00 Min: 6.00	Max: 6.00 Min: 4.50

coarse sand
fine sand

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

LOCAL / REGIONAL WATER AGENCY RECORDS

EDR Local/Regional Water Agency records provide water well information to assist the environmental professional in assessing sources that may impact ground water flow direction, and in forming an opinion about the impact of contaminant migration on nearby drinking water wells.

TOPOGRAPHIC INFORMATION

USGS 7.5' Digital Elevation Model (DEM)

Source: United States Geologic Survey

EDR acquired the USGS 7.5' Digital Elevation Model in 2002 and updated it in 2006. The 7.5 minute DEM corresponds to the USGS 1:24,000- and 1:25,000-scale topographic quadrangle maps. The DEM provides elevation data with consistent elevation units and projection.

Current USGS 7.5 Minute Topographic Map

Source: U.S. Geological Survey

HYDROLOGIC INFORMATION

Flood Zone Data: This data, available in select counties across the country, was obtained by EDR in 2003 & 2011 from the Federal Emergency Management Agency (FEMA). Data depicts 100-year and 500-year flood zones as defined by FEMA.

NWI: National Wetlands Inventory. This data, available in select counties across the country, was obtained by EDR in 2002, 2005 and 2010 from the U.S. Fish and Wildlife Service.

State Wetlands Data: Wetlands Inventory

HYDROGEOLOGIC INFORMATION

AQUIFLOW^R Information System

Source: EDR proprietary database of groundwater flow information

EDR has developed the AQUIFLOW Information System (AIS) to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted to regulatory authorities at select sites and has extracted the date of the report, hydrogeologically determined groundwater flow direction and depth to water table information.

GEOLOGIC INFORMATION

Geologic Age and Rock Stratigraphic Unit

Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - A digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

STATSGO: State Soil Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)

The U.S. Department of Agriculture's (USDA) Natural Resources Conservation Service (NRCS) leads the national Conservation Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps.

SSURGO: Soil Survey Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)

Telephone: 800-672-5559

SSURGO is the most detailed level of mapping done by the Natural Resources Conservation Service, mapping scales generally range from 1:12,000 to 1:63,360. Field mapping methods using national standards are used to construct the soil maps in the Soil Survey Geographic (SSURGO) database. SSURGO digitizing duplicates the original soil survey maps. This level of mapping is designed for use by landowners, townships and county natural resource planning and management.

Secretary

May 18, 1994

First Federal Savings & Loan Association
of Putnam County
C/O Mr. Tito Smith, Attorney
601 Saint Johns Avenue
Palatka, Florida 32077

RE: Cameron Company
310 South 10th Street
Palatka, Florida
DEP Facility #548515709

Dear Mr. Smith:

The Bureau of Waste Cleanup has reviewed the Contamination Assessment Report (CAR) Addendum and No Further Action Proposal (NFAP), dated April 15, 1994 (received April 25, 1994), submitted for this site. Documentation submitted with the NFAP confirms that criteria set forth in Rule 17-770.630(3), Florida Administrative Code (F.A.C.), have been met. The NFAP is hereby incorporated by reference in this Order. Therefore, you are released from any further obligation to conduct site rehabilitation at the site, except as set forth below.

If a subsequent discharge of petroleum or petroleum product occurs at the site, the Department may require site rehabilitation in order to reduce contaminant concentrations to the levels approved through review of the NFAP or otherwise allowed by Chapter 17-770, F.A.C.

Additionally, you are required to properly abandon all monitoring wells except compliance wells required by Chapter 17-761, F.A.C., for release detection. The wells must be abandoned in accordance with the requirements of Rule 17-532.500(4), F.A.C.

Persons whose substantial interests are affected by this Site Rehabilitation Completion Order have the right to challenge the Department's decision. Such a challenge may include filing a petition for an administrative determination (hearing) as described in the following paragraphs. However, pursuant to Chapter 17-103, F.A.C., you may request an extension of time to file the Petition. All requests for extensions of time or

Mr. Tito Smith
May 18, 1994
Page Two

petitions for administrative determinations must be filed directly with the Department's Office of General Counsel at the address given below within twenty-one (21) days of receipt of this notice (do not send them to the Bureau of Waste Cleanup).

Notwithstanding the above, a person whose substantial interests are affected by this Site Rehabilitation Completion Order may petition for an administrative proceeding (hearing) in accordance with Section 120.57, Florida Statutes (F.S.). The petition must contain the information set forth below and must be filed (received) in the Office of General Counsel of the Department at 2600 Blair Stone Road, Tallahassee, Florida 32399-2400, within twenty-one (21) days of receipt of this notice. Failure to file a petition within this time period shall constitute a waiver of any right such person may have to request an administrative determination (hearing) under Section 120.57, F.S.

The Petition shall contain the following information:

- (a) The name, address, and telephone number of each petitioner, the Department file number (DEP facility number), and the name and address of the facility;
- (b) A statement of how and when each petitioner received notice of the Department's action or proposed action;
- (c) A statement of how each petitioner's substantial interests are affected by the Department's action or proposed action;
- (d) A statement of the material facts disputed by each petitioner, if any;
- (e) A statement of facts which each petitioner contends warrant reversal or modification of the Department's action or proposed action;
- (f) A statement of which rules or statutes each petitioner contends require reversal or modification of the Department's action or proposed action; and
- (g) A statement of the relief sought by each petitioner, stating precisely the action each petitioner wants the Department to take with respect to the Department's action or proposed action.

This Site Rehabilitation Completion Order is final and effective on the date of receipt of this Order unless a petition (or time extension) is filed in accordance with the preceding paragraphs. Upon the timely filing of a petition, this Order will not be effective until further order of the Department.

When the Order is final, any party to the Order has the right to seek judicial review of the Order pursuant to Section 120.68, F.S., by filing of a Notice of Appeal pursuant to Rule

Mr. Tito Smith
May 18, 1994
Page Three

9.110, Florida Rules of Appellate Procedure, with the Clerk of the Department in the Office of General Counsel, 2600 Blair Stone Road, Tallahassee, Florida 32399-2400; and by filing a copy of the Notice of Appeal, accompanied by the applicable filing fees, with the appropriate District Court of Appeal. The Notice of Appeal must be filed within thirty (30) days from the date the Final Order is filed with the Clerk of the Department.

The DEP Facility Number for this site is 548515709. Please use this identification on all future correspondence with the Department.

Any questions you may have on the technical aspects of this Site Rehabilitation Completion Order should be directed to Michael J. Bland at (904) 921-9986. Contact with the above named person does not constitute a petition for administrative determination.

Sincerely,

John M. Ruddell, Director
Division of Waste Management

SUBJECT: Request for Extension
Cameron Company (ARC Transit Site)
310 South 10th Street, Palatka, Florida
DEP Facility No. 548515709
RS&H Project 5941257001

Dear Mr. Bland:

Please accept this letter as a request for extension to submit the "Supplemental Assessment" information requested by you in your review letter, dated November 2, 1993, for the subject site. Reynolds, Smith and Hills, Inc. (RS&H) requests this extension on behalf of First Federal Savings & Loan Association of Putnam County, represented by Tito Smith, Attorney at Law.

As discussed during our telephone conversation today, the supplemental assessment information is ready for submittal to your office. However, since you have suggested that the stockpiled soil be properly disposed prior to submittal of the supplemental information, additional time will be needed to make arrangements for such disposal. It is anticipated that the disposal of the soil will take no longer than 45 days from receipt of your extension approval.

If there are any additional questions or comments concerning this matter, please do not hesitate to contact me at 904/279-2286.

Sincerely,
Bradford J. Radloff
Bradford J. Radloff, PG

CERTIFIED - RETURN RECEIPT

Ms. Dana Jones
Cameron Company
Post Office Box 175
Palatka, FL 32178-0175

Dear Ms. Jones:

Request Notice No. RN92-2459TK54NED
Cameron Company - 310 South 10th St.
DER Facility #548515709
Putnam County - Pollutant Storage Tanks

A computer check of the Department's files shows that your facility is currently seeking cleanup assistance under the Abandoned Tank Restoration Program (ATRP).

In 1990, the Florida Legislature established that only those persons who qualify as a small business under Chapter 288.703(1), Florida Statutes, or a corporation not for profit under Chapter 617, Florida Statutes, can elect to have their sites incorporated into the state-contracted cleanup prioritization. Those eligible for restoration that do not qualify as a small business shall initiate and complete site rehabilitation and seek reimbursement pursuant to Chapter 376.3071(12), Florida Statutes.

If you feel that the referenced facility does qualify as a small business, it is requested that you complete the Small Business/Corporation Not For Profit Certification Form (copy enclosed) and submit a copy of said form to this office for review within ten (10) calendar days upon receipt of this Notice. Otherwise, it is requested that you inform this office that you, indeed, do not qualify as a small business.

If you have any questions, you may contact me at the letterhead address or at (904) 448-4320, ext. 362.

Sincerely,

DEPARTMENT OF
ENVIRONMENTAL
PROTECTION

November 2, 1993

First Federal Savings & Loan Association
of Putnam County
c/o Mr. Tito Smith, Attorney
601 St. Johns Avenue
Palatka, Florida 32077

RE: Cameron Company
310 South 10th Street
Palatka, Florida
DEP Facility #548515709

Dear Mr. Smith:

The Bureau of Waste Cleanup has reviewed the Phase II Environmental Site Assessment Report (ESAR), dated August 30, 1993 (received September 13, 1993), submitted for this site. In order to meet the requirements of Chapter 17-770, Florida Administrative Code (F.A.C.), the following comments need to be addressed:

- (1) In order to verify the July 13, 1993 groundwater samples analytical results, a water-table monitoring well should be installed in the center of the former UST area and the well sampled and analyzed for EPA Methods 602 (including MTBE), 610, and total and dissolved lead. If significant contaminant concentrations are detected, then the direction of groundwater flow should be determined and additional monitoring wells installed as needed to define the horizontal and vertical extent of the groundwater contamination. A lithologic and well completion log for the new well should be provided and the depth to groundwater reported.
- (2) It was stated in the ESAR that there is a stockpile of contaminated soil currently at the site. Soil samples should be collected from the pile and screened with an OVA to determine if it is excessively contaminated. Soil samples should also be collected and analyzed for EPA Methods 8020, 8100, and 418.1 in order to determine if the soil meets the Department's clean soil criteria or if it needs to be disposed of.

Mr. Tito Smith
November 2, 1993
Page Two

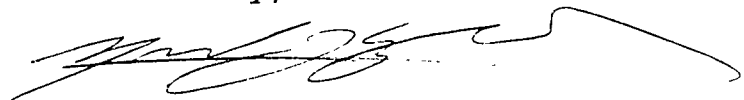

- (3) A scaled map illustrating the limits of the UST excavation and the locations of the soil samples used to determine the extent of contaminated soil should be provided. A table with the corresponding OVA readings should also be provided.
- (4) Our records indicate that in addition to the two USTs that were removed, a 750 gallon unleaded gasoline aboveground storage tank (AST) had also been removed from this site. A scaled map illustrating the locations of the USTs, AST, and dispensers should be provided.
- (5) A well survey locating all private water supply wells within a 1/4 mile radius and public water supply wells within a 1/2 mile radius should be performed. The use and construction details of wells identified during the well survey should be reported, and a map illustrating the location of the wells in relation to the subject site should be provided.
- (6) A copy of the Closure Assessment Report, and any other report that has information concerning this facility should be provided.

The DEP Facility Number for this site is 548515709. Please use this identification on all future correspondence with the Department.

Please provide the results of the supplemental assessment to me within sixty (60) days of receipt of this request. If additional time is needed, a time extension request should be submitted, in accordance with Rule 17-770.800(6), F.A.C. If you should have any questions concerning this review, please contact me at (904) 921-9986.

Please note, all supplemental contamination assessment related documents should be signed and sealed by a registered professional in accordance with Rule 17-770.500, F.A.C. The certification should be made by a registered professional who is able to demonstrate competence in the subject area(s) addressed within the sealed document.

Sincerely,

Michael J. Bland, P.G.

Discharge Reporting Form

Use this form to notify the Department of Environmental Regulation of

- 1 Results of tank tightness testing that exceed allowable tolerances within ten days of receipt of test result
2 Petroleum discharges exceeding 25 gallons on pervious surfaces as described in Section 17-761 460 F.A.C. within one working day of discovery
3 Hazardous substance (CERCLA regulated), discharges exceeding applicable reportable quantities established in 17 761 460(2) F.A.C., within one working day of the discovery
4 Within one working day of discovery of suspected releases confirmed by (a) released regulated substances or pollutants discovered in the surrounding area, (b) unusual and unexplained storage system operating conditions, (c) monitoring results from a leak detection method or from a tank closure assessment that indicate a release may have occurred, or (d) manual tank gauging results for tanks of 550 gallons or less, exceeding ten gallons per weekly test or five gallons averaged over four consecutive weekly tests

CERTIFIED - RETURN RECEIPT

Mr. Bradford J. Radloff
Reynolds, Smith & Hills, Inc.
4651 Salisbury Road
Jacksonville, FL 32256

Dear Mr. Radloff:

RE: Cameron Company (ARC Transit Site)
DEP Facility #548515709
Putnam County - Pollutant Storage Tanks

The Department is in receipt of the Phase II Environmental Assessment (ESA) report, dated August 31, 1993, regarding the referenced facility.

Although the District agrees that preliminary data obtained during the tank closure in July 1991 may be questionable, the information is being sent to the Department's Bureau of Waste Cleanup (BWC) for further evaluation. BWC's review of the data is necessary, since the site is participating in a state funded cleanup program. For additional information regarding the schedule of the review of the data, you may contact Tim Bahr in Tallahassee at (904) 448-0190.

If you have any questions, you may contact me at the letterhead address or at (904) 448-4320, ext. 357.

Sincerely,

Brian K. Kelley

CERTIFIED-RETURN RECEIPT REQUESTED

P 387 803 505

Ms. Jan Brewer
Department of Environmental Protection
Northeast District
7825 Baymeadows Way, Suite 200
Jacksonville, Florida 32256-7577

Subject: Warning Notice No. WN93-3145TK54NED
Cameron Company (ARC Transit Site)
310 South 10th Street, Palatka, Florida
DEP Facility No. 548515709

Dear Ms. Brewer:

In response to the subject warning notice, please see the attached Phase II Environmental Site Assessment (ESA) report. The Phase II ESA was conducted as a result of a Phase I ESA which was conducted subsequent to the closure of the subject underground storage tank (UST) facility. The intent of the attached report was to address obvious concerns regarding the UST facility formerly located at the site.

If you will recall our telephone conversation of June 14, 1993, during which we discussed the questionable nature of the original UST closure assessment conducted (by others) for the UST removal; it is hoped that the information provided in the attached report will be useful in re-evaluating that closure assessment.

Because the Phase II ESA was conducted primarily to confirm the results of the original closure assessment, this submittal is not necessarily intended to replace a comprehensive contamination assessment (CA). However, on the basis that the origin and nature of previous submittals are unclear, this information is submitted, rather, as a replacement of the original closure assessment.

Given the preliminary nature of the resulting data and comparing those data to those of similar type closure assessments performed in the past, further action may not be warranted on the basis that petroleum contaminants were not detected in the ground water in the area where the tanks were excavated.

Ms. Jan Brewer

-2-

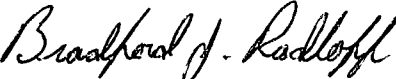

August 31, 1993

If possible, please let me know what the review schedule will be on this, since the Association for Retarded Citizens (ARC), a not-for-profit organization, is considering the purchase of the subject property contingent upon FDEP's comments/response and resulting financial matters.

If there are any questions concerning this submittal, please do not hesitate to call me at 904/279-2286.

Sincerely,

REYNOLDS, SMITH AND HILLS, INC.

Old Cameron Company (ARC Transit Site)
310 South Tenth Street, Palatka, FL
RS&H Project No. 594 1257 000

Dear Mr. Smith:

Reynolds, Smith and Hills, Inc. (RS&H) has completed the Phase II Environmental Site Assessment (ESA) for the subject property. Said services were performed in general accordance with the contract dated June 21, 1993, between RS&H and First Federal Savings and Loan Association of Putnam County (First Federal). Authorization to perform said services was provided by Mr. John Mikell, President, First Federal on June 25, 1993.

This report was prepared for the exclusive use of First Federal and those parties designated by them. The findings are relevant to the dates of our services at the site and should not be relied upon to represent conditions at substantially later dates.

1.0 INTRODUCTION/BACKGROUND

Reynolds, Smith and Hills, Inc. was retained by Tito Smith, Attorney-at-Law, representing First Federal, to conduct the subject Phase II ESA at the old Cameron Company facility located at 310 South Tenth Street, Palatka, Putnam County, Florida, (hereinafter referred to as the "Site"). It was RS&H's understanding that the Association for Retarded Citizens Transit, Inc. (ARC) which currently operates the facility is considering purchasing the Site. The purchase is, apparently, contingent upon the approval of a grant (Section 18

COPY

DRAFT

program) from the Florida Department of Transportation/ Urban Mass Transit Authority (FDOT/UMTA) and the Site's environmental condition.

The intent of this Phase II ESA was to address obvious concerns regarding the underground storage tank (UST) facility formerly located at the Site. According to a Phase I ESA report, dated April 1993, prepared by Environmental Assessment & Investigative Services, Inc. (EA&IS), the condition of the soil and/or ground water at the former location of the UST facility was unclear. In addition, the report questions two small areas of stained soil near "warehouses Nos. 2 and 3" (as identified in EA&SI's report).

Therefore, the objective of this Phase II ESA was to determine and/or confirm whether the soil and/or ground water have been impacted by the release of petroleum product(s) at the former location of the UST facility and the two stained-soil areas.

2.0 FIELD INVESTIGATION

On July 14, 1993, a total of two (2) ground water samples were collected from two (2) temporary well points or ground water probes (GWP-1, GWP-2) installed (on the same day) along with the completion of six (6) soil vapor borings (SVB). Four (4) soil vapor borings were performed in the area of the former UST location, and one (1) at each stained-soil location. Soil vapor "headspace" analyses were performed on two (2) samples from each boring at approximately equal intervals between land surface and the ground water table (GWT). The GWT was encountered at approximately three feet below land surface (BLS). The soil vapor "headspace" analysis was used to determine whether "contaminated" or "excessively contaminated" soil was present as defined by Florida Administrative (FAC) Subsection 17-770.200(2). Each sample was collected utilizing a hand auger and standard quality assurance/quality control (QA/QC) procedures as according to RS&H's approved Comprehensive Quality Assurance Plan (CompQAP No. 930062G).

The ground water samples were collected from two locations for analysis in a laboratory approved by the Florida Department of Environmental Protection (FDEP). One ground water sample was collected from just off center (toward the south) of the former UST location and one from the stained-soil location having the highest soil vapor concentrations determined by the "headspace" analysis described above. Each ground water sample was preserved, properly packed, and transported to the laboratory for analysis by Environmental Protection Agency (EPA) methods listed under Paragraph 17-770.600(8)(b), FAC, Kerosene and Mixed Product Analytical Groups.

Each ground water probe was installed utilizing 1.5-inch diameter soil stem, continuous flight augers. The augers were advanced to approximately five feet BLS where the probe was set using a rotary hammer drill. Each probe was constructed of five feet of one-inch diameter polyvinyl chloride (PVC) screen with 0.010-inch slots, and an appropriate length of blank riser casing. After each borehole was completed, the augers were quickly removed and replaced with a probe. The actual depth of the probe was dependent upon the depth to the GWT at the time of the installation since the top of the screen should not be submerged below the GWT. Since the GWT was encountered at approximately three feet BLS, two feet of screen was set below the GWT and three above.

Subsequent to installation, each probe was prepared for sample collection by removing several volumes of water using a 3/4-inch diameter teflon bailer to clear the screened interval of fine sediments. Ground water samples were collected with the teflon bailer and decanted into EPA-approved sample containers for transported to the laboratory. Field procedures, used to collect the ground water samples were performed in accordance with RS&H's approved CompQAP.

3.0 EVALUATION/RECOMMENDATIONS

The evaluation and recommendations provided herein are based on the information obtained under this investigation, and on information described in the Phase I ESA conducted in March 1993 by EA&IS.

The results of the organic vapor "headspace" analyses are provided in Table 1. The table described vapor concentrations for each of two soil samples collected from each SVB. Figure 1 illustrates the relative locations of the borings.

Table 1. Organic Soil Vapor Concentrations
Arc Transit Site, Palatka, Florida

Sample Description	Depth (Ft. BLS)	Concentrations (ppm)		
		Unfiltered	Filtered	Corrected
SVB-1	2.0	0.0	--	0.0
	3.0	4.4	--	4.4
SVB-2	2.0	0.0	--	0.0
	3.0	1.0	--	1.0
SVB-3	2.0	0.0	--	0.0
	3.0	0.0	--	0.0
SVB-4	2.0	3.2	--	3.2
	3.0	760.0	680.0	80.0
SVB-5	2.0	0.0	--	0.0
	3.0	0.0	--	0.0
SVB-6	2.0	0.0	0.0	0.0
	3.0	0.0	--	0.0

Note(s): FT. BLS = Feet Below Land Surface
SVB = Soil Vapor Boring
ppm = Parts Per Million

Because the UST facility apparently consisted of tanks storing both gasoline and diesel, and because it is not totally clear whether it was diesel or gasoline that may have leaked, FDEP requires that the data in Table 3-1 be compared to the criteria defined in Subsection 17-770.200(2) FAC for diesel and/or kerosene contamination (excessively-contaminated soil is greater than 50 ppm). Where gasoline is concerned, excessively-contaminated soil is greater than 500 ppm.

The data in Table 1 were collected on the basis of "Guidelines" provided by FDEP "for Assessment and Remediation of Petroleum Contaminated Soils," dated May 1992. Therefore, since GWT was encountered at approximately three feet BLS and soil vapor "headspace" analyses did not reveal any results above 10 ppm, it does not appear that excessively-contaminated soil exists at the points of sample collection in the areas of the former UST system and the stained soil.

As noted in Table 1, soil samples were collected at a depth which was at or below the GWT (3.0 ft BLS) to assist in placing the probe for ground water quality determination in the area of the former UST system. Although the only sample (SVB-4 at 3.0 ft BLS) exhibiting elevated vapor concentrations was comprised primarily of naturally-occurring organic vapors (e.g., methane), a probe (GWP-2) was located off center (toward the south) and what is expected to be downgradient gradient from SVB-4 to verify the possibility of ground water contamination by either the gasoline or diesel.

Another probe (GWP-1) was installed coincidentally with the soil vapor boring having the highest vapor concentrations. Because neither of the two borings (SVB-1, SVB-2) exhibited significant concentrations, SVB-2 was chosen on the basis that the soil sample collected at three feet BLS had an unusual odor.

The laboratory reports of analysis indicate that constituents of gasoline and/or kerosene/diesel, apparently, are not present at the points of sample collection. There are, however, elevated concentrations of lead (Pb) in both ground water samples which may be due to the turbidity of the sample. In general, Pb has a tendency to adsorb onto sediments which become suspended in the sample during collection. The laboratory reports and chain-of-custody are attached as supporting documentation.

On the basis of the results provided above, it appears that the ground water has either not been impacted by the release of petroleum products or the alleged contamination reported during the UST closure has volatilized or the information submitted was somehow erroneous.

However, since the elevated concentrations of Pb exceed the maximum contaminant level (MCL) established by FDEP's drinking water standards (50 ppb), a confirmation sampling may be required by FDEP to determine whether the lead is in the soil or in the ground water. Confirmation sampling in a case like this typically requires the analysis of filtered and unfiltered samples. Since there is no other obvious indication of petroleum contamination, it may be reasonable to infer that the concentrations of Pb are naturally-occurring.

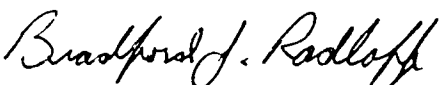

In addition, because the soil that was originally excavated from around the UST's is presently stockpiled onsite and, apparently, a soil incineration profile has not been conducted to date; it is recommended that soil samples be properly collected and analyzed in accordance with Chapter 17-775, FAC. If petroleum contaminants still exist in the stockpiled soil, the soil should be properly disposed.

It is possible that FDEP may consider these results as a confirmation of the UST closure assessment performed during the removal of the tanks, since there apparently exists some confusion related to the information/data reported for the original assessment.

Thank you for the opportunity to assist you with your environmental needs. If there are any questions regarding this information, please do not hesitate to call me at 904/279-2286.

Sincerely,

REYNOLDS, SMITH AND HILLS, INC.

RETURN RECEIPT REQUESTED

July 13, 1993

Ms. Jan P. Brewer
Department of Environmental Protection
Northeast District
7825 Baymeadows Way
Jacksonville, Florida 32256-7577

Subject: Warning Notice No. WN93-3145TK54NED
Cameron Company (ARC Transit, Inc. Site)
310 South 10th Street
DEP Facility 548515709

Dear Ms. Brewer:

Please accept this letter as notification that steps are being taken pursuant to your request for the initiation of a contamination assessment (CA) at the subject site.

As discussed over the telephone on June 14, 1993, there seems to be some question as to whether a discharge actually occurred prior to removal of the subject underground storage tank (UST) facility. As of the date of this letter, ground water samples are being collected to verify questionable data previously collected during the UST closure activities.

If there are any questions regarding this notification, please do not hesitate to contact me at 904/279-2286.

Sincerely yours,

Bradford J. Radloff
Project Manager

CERTIFIED - RETURN RECEIPT

Ms. Dana Cameron Jones
Post Office Box 175
Palatka, FL 32178-0175

Dear Ms. Jones:

Warning Notice No. WN93-3145TK54NED
Soil and/or Groundwater Contamination
Cameron Co. - 310 South 10th St.
DER Facility #548515709
Putnam County - Pollutant Storage Tanks

Chapter 403, Florida Statutes, authorizes and directs the Department of Environmental Regulation to control and prohibit pollution of air and water.

The Department is in receipt of results of groundwater analysis, which documents the presence of petroleum contaminated soil and/or groundwater at the referenced facility. Therefore, you may be in violation of Chapter 403, Florida Statutes and the rules promulgated thereunder.

The referenced facility has been found eligible to participate and seek reimbursement for cleanup under the Abandoned Tank Restoration Program (ATRP), therefore, cleanup activities should be initiated at this facility immediately.

In 1990, the Florida Legislature established that only those persons who qualify as a small business under Chapter 288.703(1), Florida Statutes, can elect to have their sites incorporated into the state-contracted cleanup prioritization. Those eligible for restoration that do not qualify as a small business shall initiate and complete site rehabilitation and seek reimbursement pursuant to Chapter 376.3071(12), Florida Statutes.

If a Small Business/Corporation Not For Profit Certification has been completed for this facility, a copy of said Notice should be submitted to this office for review within ten (10) calendar days upon receipt of this Notice. Otherwise, it is requested that the following directives be initiated.

Administration 448-4300
- 448-4310
Waste Management 448-4320

 Recycled Paper
Printed with Soy Based Inks

Water Facilities 448-4330
Water Management 448-4340
FAX 448-4366

Ms. Dana Cameron Jones
June 16, 1993
Page Two

It is a violation of Section 17-4.030, Florida Administrative Code and Sections 403.161(1)(b) and 403.087, Florida Statutes, for any facility that can reasonably be expected to be a source of pollution to operate without an appropriate and valid permit issued by the Department. Also, a facility that causes or allows the disposal of pollutant materials onto the ground may be in violation of Sections 376.302, and 403.088, Florida Statutes and 17-3.404, Florida Administrative Code, if the disposal results in a discharge to groundwater.

You are advised that any activity at your facility that may be contributing to violations of the above described statutes and rules should be ceased immediately. Continued operation of a facility in violation of state statutes or rules may result in liability for damages and restoration, and the judicial imposition of civil penalties up to \$10,000.00 per violation per day pursuant to Sections 403.141 and 403.161, Florida Statutes.

Due to the presence of petroleum contamination, it is required that you initiate a Contamination Assessment (CA) at the referenced facility according to FAC Chapter 17-770 (copy enclosed) within thirty (30) calendar days upon receipt of this Notice. Written confirmation of CA initiation shall be provided to this office by the persons conducting the CA. The confirmation should be submitted within ten (10) calendar days upon initiation of the CA.

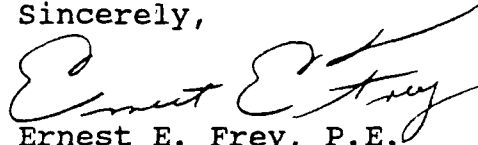

Additionally, within six (6) months upon initiating the CA, two (2) copies of a Contamination Assessment Report (CAR), prepared, signed, and sealed in accordance with FAC Chapter 17-770 shall be submitted to this office for review. If the person responsible for conducting site rehabilitation believes that the CA endpoints described in Rules 17-770.600(5) or (6), FAC, are applicable to the site, then the work outlined in the "No Further Action" and "Monitoring Only" guidelines should be followed at a minimum.

Please be advised that this Warning Notice is part of an agency investigation preliminary to agency action in accordance with Section 120.57(4), Florida Statutes. If the Department determines that an enforcement proceeding should be initiated in this case, it may be initiated by issuing a Notice of Violation or by filing a judicial action in accordance with Section 403.121, Florida Statutes. If the Department issues a Notice of Violation, and you are named as a party, you will be informed of your rights to contest any determination made by the Department in the Notice of Violation. The Department can also resolve any violation through entry into a Consent Order.

Ms. Dana Cameron Jones
June 16, 1993

July 8, 1991

Dana Carmeron Jones, President
Cameron Company
P. O. Box 175
Palatka, FL. 32178-0175

Dear Ms. Jones:

On July 3, 1991 I was on the property of Cameron Company located at 310 South 10th St., Palatka by the request of Mr. Danny Sheffield to witness the excavation of two underground storage tanks.

The excavation and reports are satisfactory with the Department. However, while I was out on the site there were several environmental hazards found.

Evidently, the facility has been used since the lumber business closed. There are several drums partially filled with what appears to be a petroleum product. Further, there are several small buckets, pans, tool boxes etc., filled with petroleum products dotting the site. Several "stained" areas also show where petroleum product has previously spilled.

All of these instances pose an environmental hazard on the site and should be addressed for clean-up.

We appreciate your help in preserving the environment. If you have any questions please call Jan Brewer at 329-0426.

Sincerely,

Jan P. Brewer

Comments:

① Contamination found - status limited to a small quantity around tanks. - soil removed & stored on site.

② #1 & #2 tanks were the ones removed.

③ #3 tank not on site as far as I can tell

④ Several environmental hazards exist on site - drums, plastic containers etc filled with various petroleum products.

-----	----	-----	-----

I REGISTRATION/NOTIFICATION		Comments				
1	Facility has registered all applicable tanks on site, 17-762 400		1	✓		
2	Current registration placard is properly displayed, 17-762 410(4)		2			✓
Proper notification has been made for the following 17-762 450						
3	Abandonment and closure (30 days prior), (1) (a)		3	✓		
4	Change of ownership (30 days after), (1) (b)		4			✓
5	Retrofitting, replacement or upgrading, (10 days prior), (1) (c)		5			✓
6	Change of tank status (in service/out-of-service), (1) (d)		6	✓		
7	Change of facility status (e.g substances stored), (1) (e)		7			✓
8	Change of method of financial responsibility (within 30 days), (2)		8			✓
9	The facility owner/operator notified DER of internal tank inspection 24 hrs prior to the test, (3)		9			✓
10	Loss of greater than 100 gallons on an impervious surface or 500 gallons inside secondary containment within one working day, 450(4)		10			✓

II RECORD KEEPING		Comments				
11	All records were maintained for two (2) years and were available for inspection within five (5) working days, 17-762.710		11			✓
12	Some but not all records were maintained for two (2) years and were available for inspection within five (5) working days, 17-762 710		12			✓

III REPORTING/DISCHARGE RESPONSE/REPAIRS		Comments				
Proper reporting requirements met for the following 17-762 460						
13	Integral piping tightness test failure within 10 days, (1)		13			✓
14	Pollutant discharge exceeding 25 gallons on a pervious surface, (2)		14			✓
15	Positive response of a release detection device within one working day, (3)		15			✓
The owner or the operator of the system which has discharged has						
16	Taken it out-of-service, 17-762 700 (1), had it repaired or replaced, .700, or properly closed it, .800		16			✓
17	Removed any regulated substances from the system, 17-762 820 (1)		17			✓
18	Tightness tested all repaired components before placing them back in service, 17-762.700 (5) & (6)		18			✓
19	Begun initial corrective actions for a release, 17-762 820 (2)		19			✓

IV INVENTORY REQUIREMENTS FOR TANKS IN CONTACT WITH SOIL		Comments				
20	All inventory requirements maintained in accordance with 17-762.720 (1)		20			✓
21	Some, but not all inventory requirements maintained in accordance with 17-762 720 (1)		21			✓

CERTIFIED - RETURN RECEIPT

Mr. T.A. Cameron
Cameron Company
310 South 10th St.
Palatka, FL 32077

Dear Mr. Cameron:

Request Notice No. RN91-1931TK54NED
Petroleum Storage System Assessment
Cameron Co. - 310 South 10th St.
Putnam County - Pollutant Storage Tanks

The Department has recently received information indicating that petroleum storage systems have been removed at the referenced facility.

Currently, the Environmental Protection Agency (EPA) and FDER require that, upon removal of an underground petroleum storage system, a closure assessment be initiated to indicate whether the storage of petroleum products have impacted the surrounding soil and or groundwater.

In response to said requirement, the Department has prepared a policy memorandum entitled "Storage System Closure Assessment Requirements" (copy enclosed), which establishes the Department's recommendations to owners and operators of regulated tank systems for complying with such requirements.

Therefore, it is requested that you comply with the current regulations by conducting a closure assessment, utilizing the Department's guidelines, within thirty (30) calendar days upon receipt of this Notice. Additionally, it is requested that said report be submitted to this office within ten (10) days of its completion.

If you have any questions, you may contact me at the letterhead address or telephone number.

Sincerely,

Brian K. Kelley
Environmental Specialist
Pollutant Storage Tanks

TO: Jan Brewer - Putnam County Local Tanks Program

FROM: Sheri A. Erhart - Northeast District Tanks Program ^{SAE}

DATE: February 11, 1992

SUBJECT: Site Inspection
Cameron Company - 310 South 10th St.
DER Facility #548515709

It is requested that the indicated field inspection be conducted at the referenced facility.

_____ FPLIRP Inspection. Complete Pollutant Storage System Inspection Report Forms and FPLIRP checklist. If the owner/operator is participating in FPLIRP, inform him/her that a "letter of intent" to file a restoration claim must be submitted to your office or the Northeast District Office. Submit photo copies of inspection reports and FPLIRP checklists along with the "letter of intent" (if available) to this office.

X

_____ ATRP Inspection. Complete Pollutant Storage System Inspection Report Form cover sheet indicating whether or not all of the storage systems on-site have been properly closed in accordance with Chapter 17-761 or 17-762, FAC. Additionally, complete a FPLIRP checklist, and submit photo copies of the Inspection Report Form and the FPLIRP checklist.

_____ EDI Re-inspection. Complete Pollutant Storage System Inspection Report Forms. In the comments section of the Inspection Report, state whether or not the facility is currently in compliance with Chapter 17-761 and/or Chapter 17-762, FAC. Submit photo copies of the Inspection Report Forms to this office.

_____ A complaint was recently received by this office regarding the possibility of a discharge at the referenced facility. Conduct a compliance inspection at the facility. If a discharge is discovered, complete a FPLIRP checklist and have the facility owner/operator complete a Discharge Reporting Form (DRF). Submit photo copies of the Inspection Report Form and the FPLIRP checklist along with any completed DRF's to this office.

February 11, 1992
Page Two

Since the requested field inspection is contamination related, it is requested that the inspection be conducted within the next two (2) weeks. If a delay is expected, please notify this office by telephone.

Additionally, please do not include the requested information with the end of the month compliance inspection form submittals, rather, the information should be directed to this office, separately, upon completion.

Dear Sir:

DER Facility #548515709

RE: Application for Eligibility for the Abandoned Tank
Restoration Program

The Department of Environmental Regulation has received your application for entry into the Abandoned Tank Restoration Program. In order to be eligible for the program, documentation of the following items must be submitted:

- Tank(s) must be properly closed.
- Documentation of petroleum contamination from the abandoned tanks.
- Used or Waste Oil Contamination Documentation (enclosed).
- Copy of the Discharge Notification (Reporting) Form - original must be sent to DER District office.
- Date the tanks were last used, not removed.
- Application Form (enclosed).
- Abandoned Tank Restoration Affidavit Form (enclosed).
- Site inspection by DER District or contracted county representatives.

Upon receipt of the above-noted documents, the Department will notify you of your eligibility to qualify for the restoration program and the effective date of your eligibility. Please be aware that in most cases, the prospective site will have to be inspected by a DER or county representative before eligibility can be granted.

If you have any questions, please contact this office at 904/488-0876.

Sincerely,

William E. Truman
Petroleum Insurance Administrator

POLLUTANT STORAGE TANK SYSTEM INSPECTION REPORT FORM

UST CLOSURE INSPECTION FORM

REGISTRATION AND NOTIFICATION 17-761.400 & .450 FAC:

		Yes	No	Unk	N/A
1. Are all of the facility's tanks properly registered?	17-761.400, FAC 1.	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
2. Has proper notification been made 30 days prior to storage tank(s) closure?	17-761.450(1)(a), FAC 2.	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
3. Has proper notice of 24 hours been given prior to storage tank(s) closure?	17-761.450(4), FAC 3.	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>

CLOSURE PROCEDURES/STATUS

4. Did a certified contractor perform the tank removal(s)?	17-761.740(2), FAC 4.	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
5. Were the storage tank(s) properly closed and removed from the site?	17-761.800(2)(d), FAC 5.	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
6. Were the storage tank(s) properly closed and filled in place?	17-761.800(2)(d), FAC 6.	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>
7. Were the storage tank(s) properly closed within 90 days of discovery?	17-761.800(2)(a), FAC 7.	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>
8. Was all liquid & sludge removed from the tank(s)?	17-761.800(2)(d), FAC 8.	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
9. Were the storage tanks properly degassed or inerted prior to transport?	17-761.800(2)(d), FAC 9.	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
10. Was all piping removed and/or removed?	17-761.800(2)(d), FAC 10.	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
11. Were all monitoring wells left in place for contamination assessment purposes?	17-761.800(2)(f), FAC 11.	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>
12. Have all monitoring wells been properly abandoned?	17-761.800(2)(f), FAC 12.	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>
13. Does it appear a closure assessment is being properly performed?	17-761.800(3), FAC 13.	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>

DISCHARGE NOTIFICATION 17-761.460. FAC

14. Was there evidence of contamination or a discharge present	460(1), (2) and (3), FAC 14.	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
--	------------------------------	-------------------------------------	--------------------------	--------------------------	--------------------------

DISCHARGE RESPONSE

15. Was free product present?	17-761.800(3)(d) & 17-761.820(2), FAC 15.	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
16. Was free product being removed?	17-761.800(3)(d) & 17-761.820(2), FAC 16.	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>

Definitions of Reporting Qualifiers

Result Qualifiers

- (U) Indicates the compound was analyzed for but not detected. The number adjacent to the "U" qualifier indicates the Reporting Limit for that compound. The Reporting Limit can vary from sample to sample depending on dilution factors or percent moisture adjustment when indicated.

Analysis (Run) Qualifiers

- (M) Matrix interference precludes achieving lower Reporting Limit. The Reporting Limit is determined by the largest peak in the sample, and the dilution is adjusted so that neither chemical nor electronic overload of the gas chromatography system takes place. Either condition could affect the reliability of peak identification and quantitation.
- (N) Sample contains non-target compounds. Many samples, especially "fuel" samples, often contain non-target compounds. This qualifier is used to alert the client to the presence of non-target compounds in samples, even if no target compounds are detected.

Reporting Limit = 1.0 ug/l for water samples and 1.0 ug/kg for soil and sediment samples unless noted otherwise.

Note: the minimum Reporting Limit for methanol extracts of high-level soil and sediment samples is 50 ug/kg due to the effect of methanol on "purging efficiency."

Analytical Methods

Purgeable Halocarbons in Water: EPA Method 601 as described in the Title 40 Code of Federal Regulations, Part 136, Appendix A, July, 1988, and CH2M Hill GC Volatiles SOP, October, 1988.

Purgeable Aromatics in Water: EPA Method 602 as described in the Title 40 Code of Federal Regulations, Part 136, Appendix A, July, 1988, and CH2M Hill GC Volatiles SOP, October, 1988.

Purgeable Halocarbons in Soil and Sediment: EPA Method 8010 as described in Test Methods for Evaluating Solid Waste (SW-846) and CH2M Hill GC Volatiles SOP, October, 1988.

Purgeable Aromatics in Soil: EPA Method 8020 as described in Test Methods for Evaluating Solid Waste (SW-846) and CH2M Hill GC Volatiles SOP, October, 1988.

Trihalomethanes in Water: EPA Method 501.1 as described in the Federal Register, Vol. 44, No. 231, Appendix C, and CH2M Hill Volatiles SOP, October, 1988.

Ethylene Dibromide in Water: EPA Method 504 (1,2-dibromomethane and 1,2-dibromo-3-chloropropane in water by microextraction and gas chromatography).

Fuel Screening: Procedure for estimation of concentration and identification of "fuel" samples; used to assist in determination of required EPA methods for subsequent analysis. This methodology is not an established EPA procedure.

State of Alabama Certification Number: 40080

State of Florida Certification Numbers: 82112 and E82124

RE: Analytical Data for Cameron Company, LMG Laboratory No. 18911
LGN Laboratory No. 97015

Dear Mr. Hash:

On July 9, 1991, the CH2M HILL Montgomery Laboratory received one sample with a request for analysis of selected organic parameters.

The analytical results and associated quality control data are enclosed. Any unusual difficulties encountered during the analysis of this sample are discussed in the case narrative.

If you should have any questions concerning the data, please inquire.

The CH2M HILL policy is to store samples for up to 30 days after reporting. If you desire, our laboratory will maintain your samples for a longer period at a cost of \$5.00 per sample per month. Samples determined to be hazardous can either be returned to you or disposed of at a cost of \$25.00 per sample.

Sincerely,

Wanda L. Hall

ANALYTICAL METHODS

Organic Analysis

Priority Pollutants: Water, soil and waste sample are analyzed in accordance with procedures described in Methods 608, 624, and 625, EPA-600/4-82-057 (1982); Methods 8080, 8240, and 8270, Test Methods for Evaluating Solid Waste, 1986, SW-846, Third Edition; and methods outlined in the USEPA Contract Laboratory Program Statement of Work for Organics Analysis, February, 1988.

Volatile Analysis (Safe Drinking Water Act): Water samples are analyzed in accordance with procedures described in Method 524.2, Federal Register (50 FR 46902), November 13, 1985.

Chlorinated Phenoxyacid Herbicides: Samples are analyzed in accordance with procedures described in Method 8150, Test Methods for Evaluating Solid Waste, 1986, SW-846, Third Edition.

Organophosphorous Pesticides: Samples are analyzed in accordance with procedures described in Methods 614 and 622, EPA-600/4-79-019 (1979) and in Method 8140, Test Methods for Evaluating Solid Waste, 1986, SW-846, Third Edition.

Phenolic Acid Analysis by GC: Samples are analyzed in accordance with procedures described in Method 604, Federal Register, 40 CFR, Part 136 (July 1, 1987) and in Method 8040, Test Methods for Evaluating Solid Waste, 1986, SW-846, Third Edition.

Polynuclear Aromatic Hydrocarbons (GC analysis): Samples are analyzed in accordance with procedures described in Method 610, Federal Register, 40 CFR, Part 136 (July 1, 1987) and in Method 8100, Test Methods for Evaluating Solid Waste, 1986, SW-846, Third Edition.

Ethylene Dibromide: Water samples are analyzed in accordance with procedures described in Method 504, Federal Register, (50 FR 46902), November 13, 1985.

Trihalomethanes: Water samples are analyzed in accordance with procedures described in Method 501.2, Federal Register, Vol. 44, No. 231, Part II, November 29, 1979.

EPA - DEFINED QUALIFIERS

ORGANICS

Definitions for the EPA-defined qualifiers:

- U -- Indicates the compound was analyzed for but not detected. The number adjacent to the "U" qualifier indicates the quantitation limit for that compound. The detection limit can vary from sample to sample depending on dilution factors or percent moisture adjustment when indicated.
- J -- Indicates an estimated value. This flag is used when the mass spectral data indicates the presence of a compound below the stated quantitation limit. The "J" qualifier is not used with pesticide results.
- C -- This flag applies to pesticide results only. The "C" flag indicates the presence of this compound has been confirmed by GC/MS analysis.
- B -- This flag is used when the analyte is found in the associated blank as well as the sample. This notation indicates possible blank contamination and suggests the data user evaluate these compounds and their amounts carefully.
- E -- This flag applies to GC/MS only. The "E" qualifier indicates a compound may be above or below the linear range of the instrument. If the particular compound level is deemed above the linear calibration range, then the sample should be reanalyzed at an appropriate dilution. Therefore, the "E" qualified amount is an estimated concentration. The results for the dilution will be reported on a separate Form I and will be flagged with a "D" if the dilution brings the concentration within proper calibration.
- D -- This flag identifies compounds which have been run at a dilution to bring the concentration of that compound within the linear range of the instrument. "D" qualifiers are only used for samples that have been run initially with results above acceptable ranges. For secondary dilutions the "DL" suffix is appended to the sample number on the Form I.
- A -- Indicates the Tentatively Identified Compound (TIC) is a suspected aldol-condensation product.
- X -- Indicates the compound concentration has been manually modified or the EPA qualifier has been manually modified or added.
- JX -- The compound was detected and quantitated below the Contract Required Quantitation Limit.

CLIENT SAMPLE ID QUALIFIERS

LEVEL 1

The qualifiers that GC/MS and GC use with the client sample ID are defined below:

- DL** -- Dilution Run
- R** -- Rerun (may be followed by a digit to indicate multiple reruns)
- RD** -- Diluted Rerun
- RX** -- Re-extraction Analysis
- MS** -- Matrix Spike (may be followed by a digit to indicate multiple matrix spikes within a sample set)
- MSD** -- Matrix Spike Duplicate (may be followed by a digit to indicate multiple matrix spike duplicates within a sample set)
- QC_BLANK** -- Method Blank (may be followed by a "W" for waters, "S" for soils run at a low level, or "SM" for soils run at a medium level -- these letters may be followed by a digit to indicate multiple blanks of that type; if there are no letters, the digit indicates multiple blanks).

These qualifiers allow GC/MS and GC to have unique client sample ID's so that the client can get more accurate information from the data reported.

DER Form #	17-761.800(1)
Form Title	Discharge Reporting Form
Effective Date	December 10 1990
DER Application No.	(Filed in by DER)

Discharge Reporting Form

Use this form to notify the Department of Environmental Regulation of

- Results of tank tightness testing that exceed allowable tolerances within ten days of receipt of test result
- Petroleum discharges exceeding 25 gallons on pervious surfaces as described in Section 17-761 460 F.A.C. within one working day of discovery
- Hazardous substance (CERCLA regulated), discharges exceeding applicable reportable quantities established in 17-761 460(2) F.A.C., within one working day of the discovery
- Within one working day of discovery of suspected releases confirmed by (a) released regulated substances or pollutants discovered in the surrounding area, (b) unusual and unexplained storage system operating conditions, (c) monitoring results from a leak detection method or from a tank closure assessment that indicate a release may have occurred, or (d) manual tank gauging results for tanks of 550 gallons or less, exceeding ten gallons per weekly test or five gallons averaged over four consecutive weekly tests

Mail to the DER District Office in your area listed on the reverse side of this form

EDR Environmental LienSearch™ Report

The EDR Environmental LienSearch Report provides results from a search of available current land title records for environmental cleanup liens and other activity and use limitations, such as engineering controls and institutional controls.

A network of professional, trained researchers, following established procedures, uses client supplied address information to:

- search for parcel information and/or legal description;
- search for ownership information;
- research official land title documents recorded at jurisdictional agencies such as recorders' offices, registries of deeds, county clerks' offices, etc.;
- access a copy of the deed;
- search for environmental encumbering instrument(s) associated with the deed;
- provide a copy of any environmental encumbrance(s) based upon a review of key words in the instrument(s) (title, parties involved, and description); and
- provide a copy of the deed or cite documents reviewed.

Thank you for your business.
Please contact EDR at 1-800-352-0050
with any questions or comments.

DEED EXHIBIT

THIS INSTRUMENT PREPARED BY AND RETURN TO:

Tito Smith, Attorney at Law
601 St. Johns Avenue
Palatka, Florida, 32177
5-711-321

WARRANTY DEED
(Corp. - Ind.)

(Statutory Form-Section 689.02 F.S.)

FL 202137 B 617 P 1290
CO: PUTNAM ST: FL

This Indenture, made this 22nd day of December, 1992, Between

CAMERON COMPANY, INC.,

a corporation existing under the laws of the state of FLORIDA having its principal place of business at P. O. BOX 175, PALATKA, FLORIDA 32178, and lawfully authorized to transact business in the state of FLORIDA, grantor*, and

ARC TRANSIT, INC., a Florida corporation

whose post office address is 1209 WESTOVER DRIVE, PALATKA, FLORIDA 32177 hereinafter called the grantee*.

WITNESSETH: That said grantor, for and in consideration of the sum of TEN AND NO/100 (\$10.00) Dollars, and other good and valuable considerations to said grantor in hand paid by said grantee, the receipt whereof is hereby acknowledged, has granted, bargained and sold to the grantee, and grantee's heirs and assigns forever, the following described land, situate, lying and being in County, Florida, to wit:

Property Folio No. - 42-10-27-6850-1600-0011

PARCEL #1: Being in the City of Palatka, Putnam County, Florida, and being more particularly described as follows: The Northerly 100 feet of the Easterly 100 feet of Block 160 of the City of Palatka, Florida. The same having a frontage of 100 feet on Laurel Street and having a frontage of 100 feet on Tenth Street. Said Tract of land being situated in the Extreme Northeast corner of said Block 160, City of Palatka, Putnam County, Florida.

PARCEL #2: All of Block 160, and the East 1/2 of South 11th Street, between Laurel and Carr Streets (previously closed by the City of Palatka) of the City of Palatka, Putnam County, Florida, (EXCEPT THAT PART DESCRIBED IN O. R. BOOK 386, PAGE 1631, OF THE PUBLIC RECORDS OF PUTNAM COUNTY, FLORIDA).

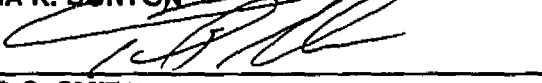

SUBJECT TO MORTGAGE TO FIRST FEDERAL SAVINGS AND LOAN ASSOCIATION OF PUTNAM COUNTY RECORDED IN O. R. BOOK 480, PAGE 1240.

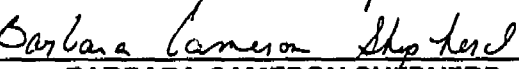

Subject to restrictions, reservations, easements and limitations of record, if any, provided that this shall not serve to reimpose same, zoning ordinances, and taxes for the current year and subsequent years.

Said grantor does hereby fully warrant the title to said land, and will defend that same against the lawful claims of all persons whomsoever.

**Grantor" and "grantee" are used for singular or plural, as context requires.

In Witness Whereof, Grantor has hereunto set grantor's hand and seal the day and year first above written. Signed, sealed and delivered in our presence.

The Sanborn Library has been searched by EDR and maps covering the target property location as provided by Ayres Associates were identified for the years listed below. The Sanborn Library is the largest, most complete collection of fire insurance maps. The collection includes maps from Sanborn, Bromley, Perris & Browne, Hopkins, Barlow, and others. Only Environmental Data Resources Inc. (EDR) is authorized to grant rights for commercial reproduction of maps by the Sanborn Library LLC, the copyright holder for the collection. Results can be authenticated by visiting www.edrnet.com/sanborn.

The Sanborn Library is continually enhanced with newly identified map archives. This report accesses all maps in the collection as of the day this report was generated.

WARRANTY DEED
(Corp. - Ind.)

(Statutory Form-Section 689.02 F.S.)

FL 202137 B 617 P 1290
CO: PUTNAM ST: FL

This Indenture, made this 22nd day of December, 1992, Between

CAMERON COMPANY, INC.,

a corporation existing under the laws of the state of FLORIDA having its principal place of business at P. O. BOX 175, PALATKA, FLORIDA 32178, and lawfully authorized to transact business in the state of FLORIDA, grantor*, and

ARC TRANSIT, INC., a Florida corporation

whose post office address is 1209 WESTOVER DRIVE, PALATKA, FLORIDA 32177 hereinafter called the grantee*.

WITNESSETH: That said grantor, for and in consideration of the sum of TEN AND NO/100 (\$10.00) Dollars, and other good and valuable considerations to said grantor in hand paid by said grantee, the receipt whereof is hereby acknowledged, has granted, bargained and sold to the grantee, and grantee's heirs and assigns forever, the following described land, situate, lying and being in County, Florida, to wit:

Property Folio No. - 42-10-27-6850-1600-0011

PARCEL #1: Being in the City of Palatka, Putnam County, Florida, and being more particularly described as follows: The Northerly 100 feet of the Easterly 100 feet of Block 160 of the City of Palatka, Florida. The same having a frontage of 100 feet on Laurel Street and having a frontage of 100 feet on Tenth Street. Said Tract of land being situated in the Extreme Northeast corner of said Block 160, City of Palatka, Putnam County, Florida.

PARCEL #2: All of Block 160, and the East 1/2 of South 11th Street, between Laurel and Carr Streets (previously closed by the City of Palatka) of the City of Palatka, Putnam County, Florida, (EXCEPT THAT PART DESCRIBED IN O. R. BOOK 386, PAGE 1631, OF THE PUBLIC RECORDS OF PUTNAM COUNTY, FLORIDA).

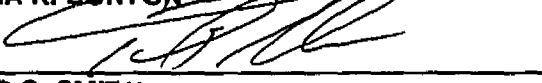

SUBJECT TO MORTGAGE TO FIRST FEDERAL SAVINGS AND LOAN ASSOCIATION OF PUTNAM COUNTY RECORDED IN O. R. BOOK 480, PAGE 1240.

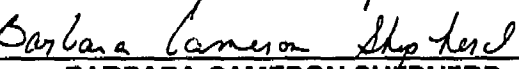

Subject to restrictions, reservations, easements and limitations of record, if any, provided that this shall not serve to reimpose same, zoning ordinances, and taxes for the current year and subsequent years.

Said grantor does hereby fully warrant the title to said land, and will defend that same against the lawful claims of all persons whomsoever.

*"Grantor" and "grantee" are used for singular or plural, as context requires.

In Witness Whereof, Grantor has hereunto set grantor's hand and seal the day and year first above written. Signed, sealed and delivered in our presence.

Appendix F
Site Reconnaissance Photographs

Sheet 1

Four 500-gallon petroleum storage tanks on site. Two contain unleaded gasoline and two ASTs contain diesel fuel..

Several transport buses on parcel parked adjacent to the city-owned parcel which adjoins the Ride Solutions Inc parcel.

Neither spillage nor staining were evident beneath the above ground petroleum storage tanks on the subject parcel.

Some of the transport buses used by Ride Solutions Inc to transport clients to medical appointments and other destinations.

Sheet 2

Large storage building located on Ride Solutions Inc. parcel.

Miscellaneous personal and bus equipment stored into the building.

Various bus parts and used 55-gallon plastic drums were stored inside the building. The drums were empty and cleaned and eventually are recycled.

Various pieces of equipment and bus parts stored beside the vehicle maintenance facility.

Sheet 3

Used bus parts stored along fence line which borders the R/W adjoining the City-owned parcel to the south of Ride Solutions Inc.

Empty 55-gallon drums of engine fluids stored alongside of the fence which borders the western property boundary.

Inside the bus maintenance garage. Very well maintained with no visible staining or fluid spillage inside the repair facility.

Waste oil receiving tank stored outside the bus repair garage. Oil staining is minimal and on a concrete pad. Waste oil is periodically pumped out and recycled by a local waste recycler.

Sheet 4

Outdoor bus garage bay for outside vehicle maintenance and cleaning.

Outdoor bus garage bay for outside vehicle maintenance and cleaning.

Examples of the buses used by Ride Solutions Inc. for transporting their clientele to appointments in Putnam County.

Former Ride Solutions Inc. offices now used as the drivers lounge area.

Tier 2 Reporting Workshop, 2015

Bill joined Ayres Associates in 2015 with four years of environmental consulting experience and a strong regulatory compliance background. He has conducted Phase 1 and 2 environmental site assessments (ESAs); groundwater monitoring; brownfield site investigations; and regulatory reporting for federal, state, and private clients.

Bill has prepared work plans, health and safety plans, National Pollutant Discharge Elimination System (NPDES) permits, and monitoring reports, and he has provided technical support for municipal water, wastewater, gas, and electrical system operations. This technical support included environmental sampling, air permitting, stormwater permitting, Tier 2 reporting, auditing, training, and emergency oil spill response.

His field experience includes soil, groundwater, vapor, concrete, and asbestos sampling. He facilitates collaboration and communication with clients, peers, regulatory agencies, and subcontractors to meet project objectives and deadlines.

Bill's previous Phase 1 and 2 ESA clients include:

- Tennessee Department of Transportation
- Tennessee Department of Environment and Conservation
- U.S. Navy, Naval Facilities Engineering Command (NAVFAC)
- United Technologies Corporation
- Aleris Rolled Products
- Aluminum Company of America (ALCOA)
- Knoxville Utilities Board
- Pickens Village Partners
- City of Alcoa
- Horsehead Industries
- Continental Tire
- Metropolitan Knoxville Airport Authority
- Tennessee Department of Corrections
- Mahle Group

Erin Gross, Environmental Scientist

Total Experience

Emergency Response 24-Hour
Training, National
Environmental Trainers, 2014*

Education

*BS, Geological Engineering and
Geology & Geophysics,
University of Wisconsin-Madison,
2014*

*BA, Physics, Carthage College,
2011*

Memberships

*Association of Environmental and
Engineering Geologists (AEG)*

*Wisconsin Ground Water
Association (WGWA)*

*National Ground Water
Association (NGWA)*

*Geological Society of America
(GSA)*

*Sigma Xi (Scientific Research
Society)*

*Sigma Pi Sigma (Physics Honors
Society)*

Ms. Gross joined Ayres Associates' environmental engineering staff in April 2014, bringing previous experience with previous research positions while completing her undergraduate degree. Ms. Gross assists lead project engineers in developing engineering plans and performing field activities including soil, groundwater, and air sampling. Ms. Gross assists with environmental impact assessments and statements and Phase 1 environmental site assessments.

Additional Coursework in Geology, UW-Milwaukee and UW-Eau Claire, 2012 – Present

Memberships

American Institute of Professional Geologists, Student Member

Mr. Banach joined Ayres Associates in 2013, bringing five years of experience as an environmental scientist. His background includes performing and managing Phase 1 and 2 environmental site assessments (ESAs), site investigations, storage tank closures, National Environmental Policy Act environmental assessments, hazardous building material assessments, and regulatory compliance projects. He has significant experience in preparing regulatory reports, permits, and plans for industrial facilities at the federal, state, and local levels, including hazardous substances, air emissions, hazardous waste, wastewater, stormwater pollution prevention, and oil spill prevention.

His field experience includes soil, groundwater, wastewater, stormwater, air, lead paint, and asbestos bulk sampling; active groundwater remediation; and regulatory compliance facility inspection. Throughout his project experience, Mr. Banach has demonstrated his ability to communicate and collaborate with clients, co-workers, regulatory agencies, and subcontractors to complete project goals.

Here is what Ron Walsh, Elk Mound Area School District Superintendent, had to say about Mr. Banach's work on the District's high school underground storage tank site assessment sampling and engineering services project: "Mitchell Banach knew what he was doing and kept things going smoothly."
